- <sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.
- Area B1, 3 hours;
  - Area B2, 1 hour;
  - Area D1, 8 hours;
  - Area D2, 3 hours.
- <sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                                               | Title                                                        | Credit Hours |

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

## Program Learning Outcomes

Graduates will be able to:

- Explain the concepts of confidentiality, integrity and availability (CIA) in context of Information Assurance, and articulate the threats to CIA.
- Analyze a given information system, identify vulnerabilities and threats and recommend and implement physical, and logical controls to eliminate the vulnerabilities and mitigate the threats
- Design, build, and maintain a system with multiple operating systems, systems software and hardware (both physical and virtual), network services and security.
- Demonstrate analytical skills in identifying and troubleshooting networking, security and performance issues.
- Use current methods to design and implement secure databases and software.

- Effectively communicate technical information to audiences with different levels of technical expertise; communicate this information in formal, technical documentation and verbally in an oral presentations.

# Cybersecurity Management (MS)

## Program Overview

The Master of Science in Cybersecurity Management offered by the TSYS School of Computer Science provides students with the opportunity to join the cybersecurity workforce as well-qualified professionals. Students will learn how to protect critical information infrastructures by developing, implementing and maintaining appropriate cybersecurity policies and practices to help prevent, detect and eliminate security threats.

## Career Opportunities

Typical current cybersecurity positions include:

- Cybersecurity Manager
- Cybersecurity Management Consultant
- Cyber Security Analyst- Awareness and Education
- Cybersecurity Regulatory Governance Lead
- Cyber Security Measures and Reporting Lead
- IT Cyber Security Controls Assessor
- Information Security Governance Specialist
- Cybersecurity Regulatory Compliance Instructor
- Cybersecurity Policy and Compliance Analyst

## Program of Study

Students will be able to graduate with an MS degree in Cybersecurity Management at Columbus State University by completing thirty credit hours.

## Admission Requirements

Requirements for admission into the program for the Master of Science in Cybersecurity Management include the following:

A four-year undergraduate degree from an accredited college or university with a minimum 2.75 cumulative undergraduate GPA, AND any one of:

- A minimum 3.00 cumulative GPA in the student's undergraduate major
- A combined score of at least 290 on the verbal and the quantitative sections of the GRE
- Significant experience (as judged by the Computer Science School) in industrial cybersecurity management as documented by a resume and other appropriate documents, including published papers or patents.

## Additional Program Requirements

Approval of an application for the Master of Science degree in Applied Computer Science is contingent upon the successful completion of an approved program and recommendation for the degree by the Turner College of Business. Applications for degree conferral must be submitted to the Office of the Registrar no later than the semester prior to completion of degree requirements.

The following requirements must be met for the completion of the degree program:

- Students must earn a 3.0 grade point average calculated on all graduate work attempted for which letter grades are awarded.
- A maximum of two courses (not to exceed eight semester credit hours) with a grade of "C" may apply to the degree.
- At least 24 of the hours required for the degree must be earned in the program. A maximum of six semester hours with no grade lower than B may be accepted for transfer. Transfer credit will not be used in computing the student's grade point average.
- All degree requirements must be completed within seven years of first enrollment.
- Any program for the Master of Science in Cybersecurity Management must include at least ten courses (30 semester hours) taken for graduate credit.
- Any program for the Master's Degree in Cybersecurity Management must include six courses (18 semester hours) in the Core Curriculum.

- A student opting for a thesis in Cybersecurity Management must take CSMT 6985 Research and Thesis at least twice for a minimum total of six credit hours. Only six hours of CSMT 6985 Research and Thesis may be applied to the Master's Degree. A candidate for the MS thesis option degree must take CSMT 6986 Thesis Defense during the semester of their defense.
- A student who elects the thesis option for the degree may not graduate until a thesis has been produced, approved by the student's thesis committee, and successfully defended in a public presentation.

## Program Learning Outcomes

All graduates in the MS in Cybersecurity Management program offered by the TSYS School of Computer Science will learn the essential skills necessary to join the cybersecurity workforce at mid to upper level management. Graduates will be able to:

- Identify threats and vulnerabilities to information systems
- Formulate policies for the protection of information in compliance with prevailing standards, legal frameworks and best practices
- Manage the implementation of policies to help prevent, detect and eliminate security threats
- Oversee the use of technologies to mitigate threats and reduce risks to information systems

## Cybersecurity of FinTech (Nexus)

### Program Overview

The Cybersecurity Nexus is a 60-credit undergraduate program designed largely for the training of cybersecurity professionals to meet the local and statewide need. Most of the coursework in this program encompasses CSU's Core Curriculum requirements in addition to 18 hours of cybersecurity coursework.

## Career Opportunities

<sup>1</sup> ITDS 1145, though listed under both humanities and fine arts, may be taken only once.

<sup>2</sup> Also recognized as FinTech Cyber Breach Deterrence Analyst

<sup>3</sup> Also recognized as meeting the requirements of the following NIST NICE Framework Work Roles:

- Cyber Defense Incident Responder
- Law Enforcement Forensic Analyst
- Cyber Defense Forensic Analyst

## Program Map

Nexus Cybersecurity of FinTech program map ([https://catalog.columbusstate.edu/academic-units/business/computer-science/computer-science-nexus-cybersecurity-fintech/Nexus\\_PoS\\_Template.pdf](https://catalog.columbusstate.edu/academic-units/business/computer-science/computer-science-nexus-cybersecurity-fintech/Nexus_PoS_Template.pdf))

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

## Program Learning Outcomes

- Students demonstrate competency in written and oral communication by being able to communicate effectively in the cybersecurity work environment.
- Students demonstrate competency in interpreting the meaning of key IT and computer networking terms and concepts and be able to apply them in cybersecurity.
- Students demonstrate competency in critical thinking by interpreting and evaluating documented evidence, drawing valid conclusions based on the information presented, and solving real-world cybersecurity problems.
- Students demonstrate competency in preparation for a professional work role in cybersecurity by passing five professional certifications and successfully completing a comprehensive real-world cybersecurity simulation.

## Information Technology (BSIT)

## Program Overview

The B.S. Information Technology (BSIT) program provides students with a combination of knowledge, hands-on experience, and application of theory to support their employment in the field of Information Technology. The curriculum emphasizes quantitative and communication skills as well as providing a basic foundation in understanding the business process and the role of Information Technology in supporting that process. The BSIT is also available online (p. 217).

Computer science and information technology graduates find jobs in a wide array of occupations including software engineering, application, game, and web programming, network administration and security, and database administration. Because computers are becoming more and more pervasive, computer science and information technology jobs are available in almost every field. According to the US Department of Labor, computer science and information technology job opportunities are expected to grow at approximately 22% through 2020, which is much faster than the average for all occupations.

## Career Opportunities

Business/Systems Analysts, Database Administrators, Network Manager, Network & Security Specialists

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                                                    | Title                                                                                                     | Credit Hours |
|---------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                          |                                                                                                           |              |

| <b>Total Credit Hours</b> |                  | <b>123</b> |

- <sup>1</sup> Must be a pair of courses: CPSC 2125 Internet Programming-CPSC 4125 Server-Side Web Development or CPSC 3111 COBOL Programming-CPSC 3156 Transaction Processing or CYBR 3106 Cybersecurity Risk Management-CYBR 3119 Fundamentals of Digital Forensics.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

Students must earn a C or better in all WBIT, CPSC and MISM courses in Areas F, G, and H.

## Program Learning Outcomes

- Apply fundamental systems analysis, project management, and end user support concepts to address real-world business problems
- Apply analytical and critical thinking skills to develop creative solutions to these problems
- Apply professional and interpersonal skills to communicate these solutions to both coworkers and management
- Assess software solution functions as a part of the overall business solution to the problem at hand

## Information Technology (online) (BSIT)

### Program Overview

The B.S. Information Technology (BSIT) program provides students with a combination of knowledge, hands-on experience, and application of theory to support their employment in the field of Information Technology. The curriculum emphasizes quantitative and communication skills as well as providing a basic foundation in understanding the business process and the role of Information Technology in supporting that process. The BSIT is available 100% online.

Computer science and information technology graduates find jobs in a wide array of occupations including software engineering, application, game, and web programming, network administration and security, and database administration. Because computers are becoming more and more pervasive, computer science and information technology jobs are available in almost every field. According to the US Department of Labor, computer science and information technology job opportunities are expected to grow at approximately 22% through 2020, which is much faster than the average for all occupations.

## Career Opportunities

Business/Systems Analysts, Database Administrators, Network Manager, Network & Security Specialists

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A " (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

Note: The Humanities/Fine Arts/Social Science electives can be exchanged in their order.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

Students must earn a C or better in all WBIT, CPSC and MISM courses in Areas F, G, and H.

## Program Learning Outcomes

- Apply fundamental systems analysis, project management, and end user support concepts to address real-world business problems
- Apply analytical and critical thinking skills to develop creative solutions to these problems
- apply professional and interpersonal skills to communicate these solutions to both coworkers and management
- Assess how a software solution fits as a part of the overall business solution to the problem at hand

## College of Education & Health Professions

The College of Education and Health Professions offers programs in Teacher Education, Educational Leadership, Counseling, Nursing, Health Science, and Exercise Science. With over 2,500 students enrolled in the College of Education and Health Professions and over 450 degrees

awarded per year, we are a significant contributor to the local and regional job market.

Our candidates are widely recruited due to the reputation of our programs. Over 50% of the teachers in Muscogee County are graduates of Columbus State University, and approximately 65% of the area's nurses are Columbus State University graduates. We contribute significantly to the educational and health care needs of the community.

We believe in the importance of being leaders in our fields. Faculty in the College of Education and Health Professions are engaged in the community through partnerships with school districts, hospitals, clinics, and other organizations. Our education faculty are often invited to speak across the state and nationwide about our success with new teacher preparation assessments and our effective partnerships with school districts. Our nursing faculty are being invited to speak at national conferences about preparing nurses to offer a high quality patient care in a health care system under strain due to workforce shortages. Exercise science and health science faculty are conducting research to gain insight into the obesity problem that plagues our nation in an effort to prevent diseases.

Several outreach centers support our efforts to have an impact on the community, providing invaluable service to the region. These centers include the Center for Quality Teaching and Learning, the Coca-Cola Space Science Center, the Columbus Regional Mathematics Collaborative, the Ivey Center for the Cultural Approach to History, and Oxbow Meadows Environmental Learning Center.

Our goal is to elevate the quality of life in Columbus by leading the region in innovative education and cutting edge health care. We strive to have a positive effect on the quality of life in the community and the region by making ourselves known for our expertise in the fields of education and health professions.

## Departments

- Department of Kinesiology & Health Sciences (p. 221)
- School of Nursing (p. 238)
- Teacher Education, Leadership, and Counseling (<https://catalog.columbusstate.edu/academic-units/education-health-professions/tlc/>)

## Department of Kinesiology & Health Sciences

The Department of Kinesiology & Health Sciences offers undergraduate and graduate programs that prepare students for a variety of careers related to health, education, or exercise science or for professional graduate programs in physical therapy, occupational therapy, physician's assistant and related areas. Programs provide strong academic work and an abundance of practical experience in school, exercise, and clinical settings. The department also houses the Wellness Program, which provides the course work to meet the three-credit wellness/physical activity requirement for students in all programs of study. The Health and Physical Education programs are approved by the Georgia Professional Standards Commission.

The Department of Kinesiology & Health Sciences offers the following degrees:

- Exercise Science (MS) (p. 221)
- Health and Physical Education (MAT) (p. 222)
- Health and Physical Education (MEd) (p. 223)
- Health Science (BS) (p. 224)
- Kinesiology (BS) - Exercise Science Concentration (p. 227)
- Kinesiology (BS) - Health & Physical Education Non-Certification Concentration (p. 231)
- Kinesiology (BS) - Health & Physical Education Teacher Certification Concentration (p. 234)
- Master of Public Health (MPH) (<https://catalog.columbusstate.edu/academic-units/education-health-professions/kinesiology-health-sciences/public-health-mph-maternal-child-concentration/>)

## Exercise Science (MS)

### Program Overview

The Master of Science (M.S.) in Exercise Science is designed to accommodate a broad range of student interests and professional goals who wish to advance their knowledge and skills in the field of Exercise Science. The 30-hour program includes a required 18-hour core with the remaining 12 hours consisting of elective courses designed to meet the professional goals and needs of each individual student. Students can choose between a thesis or non-thesis option, with the thesis option for students who have the ability and desire to pursue an individualized research topic within the field of Exercise Science.

Students enrolled in the program will have the opportunity to personally interact with program faculty in the classroom and laboratory. The Exercise Science "Human Performance Laboratory" is equipped with state of the art equipment such including the Moxus Modular VO2 System (AEI Technologies), True-One 2410 Metabolic Measurement System (ParvoMedic), Bod Pod (COSMED Inc.), Excalibur Sport Anaerobic Power System (LODEBV), Ergomedic 894E Peak Bike (Monark), Quinton Q4500 Stress Test System, 12-lead Electrocardiograph, and numerous other equipment.

### Career Opportunities

Exercise Science is the gateway degree for individuals who wish to work in any phase of the fitness industry, e.g., corporate- and hospital-based Wellness, club fitness, YMCA, geriatric programming, personal training, etc. In addition, many students currently at CSU are using the degree as a pre-professional program for graduate programs in Athletic Training, Occupational Therapy, Physical Therapy, and Physician's Assistant. Finally, the educational content in Exercise Science also helps prepare students for success in careers such as pharmacology sales, military science, orthotics, etc. (e.g., many health/fitness related fields where the career path is not fixed).

<sup>1</sup> Note - The plan of study for Area 2 requires approval by the program director or advisor.

## Admission Requirements

Beyond the general graduate program requirements, the M.S. Exercise Science degree program also has the following additional requirements:

- Minimum grade point average (GPA) of 2.75 for regular admission
- Baccalaureate degree in Exercise Science, Kinesiology, or related field. Other degree fields considered provided the student has demonstrated competence in human anatomy/physiology and/or exercise physiology (contact program director for information)
- Two letters of recommendation that address qualifications and potential to succeed in the program. At least one letter should be from an academic professional (e.g. former professor or instructor).

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Demonstrate an advanced knowledge base in the discipline of Exercise Science.
- Demonstrate ability to design, interpret, analyze, and apply research in the discipline of Exercise Science.
- Demonstrate the ability to critically evaluate information and communicate the findings logically.

## Health and Physical Education (MAT) Program Overview

The Master of Arts in Teaching (M.A.T.) program in Health and Physical Education is designed to provide both a master's degree and initial teacher certification at the T-5 level for individuals holding a bachelor's degree in a closely related field of study (e.g. exercise science, athletic training). Certification in this field is for grades Pre-K through 12. The M.A.T. provides professional and pedagogical studies that develop proficiency in the knowledge, skills, and habits of beginning teachers. While specific course work is in place to ensure meeting teacher certification requirements set by the Professional Standards Commission, aspects of the program are individually designed based on a transcript evaluation.

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

This plan of study will be determined by the program coordinator based on an evaluation of each student's transcripts and educational experiences. Students who do not have appropriate experiences and coursework may need to take up to 51 credit hours.

## Career Opportunities

Successful completion of the M.A.T. program and passing scores on the appropriate Georgia Assessments for the Certification of Educators (GACE) basic skills and content tests allow the candidate to be recommended to the Georgia Professional Standards Commission for teacher certification at the T-5 level (i.e., the letter "T" indicates that the certificate is in a teaching field and the number "5" indicates that the candidate's highest degree is a master's degree recognized by the Georgia Professional Standards Commission).

<sup>1</sup> There is a recent rule change for certification from the Georgia Professional Standards Commission. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219 This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

**Note:** This plan of study will be determined by the program coordinator based on an evaluation of each student's transcripts and educational experiences.

## Admission Requirements

- Degree in related field or a minimum of 25 semester hours of approved coursework
- Transcript evaluation
- Minimum grade point average (GPA) of 2.75 (regular admission) or 2.50 (provisional admission) on all undergraduate work
- Admission to the Teacher Education Program (go to [http://safe.columbusstate.edu/teacher\\_ed.php](http://safe.columbusstate.edu/teacher_ed.php) for more information)

## Additional Program Requirements

- 3.0 GPA calculated on all graduate work attempted. "Academic Forgiveness" policy does not apply to graduate studies
- Students cannot graduate with a grade of "C" or below in more than two (2) graduate courses
- Minimum of 27 hours of the hours required for the degree must be earned in residence (75%) Asynchronous (online) and distance learning courses administered through Columbus State University constitute courses taken in residence

- Maximum of nine (9) semester hours of transfer credit or courses taken at CSU prior to full admission to a masters degree program may be applied toward the degree. Courses with earned grades of "C" or below cannot be transferred. The student's advisor and the coordinator of the program in which the student is enrolled must approve any courses transferred
- All degree requirements must be completed within seven (7) years of first enrollment
- Students must pass a written comprehensive examination

## Program Learning Outcomes

- Demonstrate an advanced knowledge base of the disciplines of health and physical education
- Locate, evaluate, conduct, interpret and apply research for the improvement of teaching
- Examine and use effective teaching behaviors, different teaching styles, and technology when appropriate
- Demonstrate the ability to meet the needs of students of different abilities, genders, and racial and cultural backgrounds

## Health and Physical Education (MEd) Program Overview

The M.Ed. program in health and physical education is designed for teachers who hold a clear renewable T-4 teaching certificate. It provides advanced professional and pedagogical studies that develop expertise in the knowledge, skills, and habits of accomplished teachers.

## Career Opportunities

Upon successful completion of the M.Ed. program, the candidate may apply to upgrade teacher certification to the T-5 level.

## Admission Requirements

- Minimum grade point average (GPA) of 2.75 (regular admission) or 2.50 (provisional admission) on all undergraduate work at an accredited United States institution in fulfillment of the requirements for a baccalaureate degree
- A clear renewable teaching license or documentation of eligibility for certification (approved program completion and applicable licensure exam scores)
- The successful applicant must not have a criminal record or discharge from the armed services that would prevent recommendation for related teacher certifications

## Additional Program Requirements

- Students must earn a 3.0 GPA calculated on all graduate work attempted. "Academic Forgiveness" policy does not apply to graduate studies
- Students cannot graduate with a grade of "C" or below in more than two (2) graduate courses
- A minimum of 27 hours of the hours required for the degree must be earned in residence (75%). Asynchronous (online) and distance learning courses administered through Columbus State University constitute courses taken in residence
- A maximum of nine (9) semester hours of transfer credit or courses taken at CSU prior to full admission to a masters degree program may be applied toward the degree. Courses with earned grades of "C" or below cannot be transferred. The student's advisor and the coordinator of the program in which the student is enrolled must approve any courses transferred
- All degree requirements must be completed within seven (7) years of first enrollment.
- Students must pass a written comprehensive examination

## Program Learning Outcomes

- Demonstrate an advanced knowledge base of the disciplines of health and physical education.
- Locate, evaluate, conduct, interpret and apply research for the improvement of teaching

- Examine and use effective teaching behaviors, different teaching styles, and technology when appropriate
- Demonstrate the ability to meet the needs of students of different abilities, genders, and racial and cultural backgrounds

## Health Science (BS)

### Program Overview

The Bachelor of Science in Health Science is designed as a fundamental health-related degree that will enable students to pursue a variety of careers related to our population's health status. Graduates will have the basic skills and knowledge needed to become an asset to the health care community. Students are encouraged to become nationally recognized certified health education specialists (CHES) through the National Commission for Health Education Credentialing ([www.nchec.org](http://www.nchec.org)) (<http://www.nchec.org>). Students are also encouraged to advance their education at one of the Programs or Schools of Public Health. The website is <http://www.aspph.org/> for more information. There are a variety of opportunities for students majoring in Health Science.

### Career Opportunities

There are a variety of opportunities for students majoring in Health Science. Possible career paths include:

- Medicine (Physician or Physician's Assistant)
- Occupational Therapy
- Physical Therapy
- Environmental health
- Behavioral sciences-health education
- Epidemiology
- Health service administration
- Maternal and child health
- Nutrition
- International-global health
- Community outreach
- Research
- Counseling

Students must understand that some allied health professions require additional certification or other designated criteria along with their educational degree in health science.

### Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

### Core Requirements

| Code                           | Title                                       | Credit Hours |
|--------------------------------|---------------------------------------------|--------------|
| <b>Area A Essential Skills</b> |                                             |              |
| ENGL 1101                      | English Composition I (minimum grade of C)  | 3            |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To count toward graduation, all grades must be "C" or better of courses in Areas A, D, F, G, and H.
- Many graduate programs require an entrance examination. Students should take this exam prior to applying for graduate programs.
- Students should work with their advisor to ensure all required courses are taken for the graduate program of choice
- PHED 1205 Concepts of Fitness is required for all students unless they are over the age of 40, a prior military service member, or have a documented disability.

## Admission Requirements

Students must have a grade point average of at least 2.5 or higher to transfer into the Health Science major.

## Additional Program Requirements

- Students must earn a grade of C or above in all science, math, and health science courses located in Areas F, G, and H of the curriculum in order to be eligible for graduation.
- Students must confirm their course selection each semester with an Academic Advisor.

## Program Learning Outcomes

- Understand the role of the health professional in the provision of services to clients/patients.
- Be able to compile, calculate and use health-related data to identify and evaluate health needs, interests and concerns of individuals and/or groups.
- Be able to function as public health professionals for the health-related problems of individuals in the school, workplace or various community environments.
- Be able to identify and describe the behavioral determinants of good mental and physical health.
- Possess the skills and knowledge needed in order to develop a comprehensive educational program that focuses on tobacco use prevention, cancer education, diabetes education and other health-related topics.

## Kinesiology (BS) - Exercise Science Concentration

### Program Overview

The B.S Kinesiology degree with a concentration in Exercise Science is designed to accommodate a broad range of student interests and professional goals including careers in the health and fitness industry and graduate work in physical therapy, occupational therapy, exercise science / physiology, or other allied health professions. The program offers thorough and rigid core of theoretical and practical courses balanced with flexibility through program electives.

### Career Opportunities

The BS degree program in Exercise Science is designed to accommodate a broad range of student interests and professional goals including careers in the health and fitness industry or graduate work in physical therapy, occupational therapy, or exercise science.

### Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

### Core Requirements

| Code                           | Title                                       | Credit Hours |

<sup>1</sup> Based on placement score; MATH 1111 College Algebra is recommended.

<sup>2</sup> CHEM 1151 Survey of Chemistry I or CHEM 1211 Principles of Chemistry I should be taken in consultation with advisor based on professional goals. CHEM 1151 Survey of Chemistry I/CHEM 1152 Survey of Chemistry II with labs is satisfactory for fitness / wellness options. CHEM 1211 Principles of Chemistry I/CHEM 1212 Principles of Chemistry II with labs is necessary for most pre-professional options (PT, PA, and some OT).

<sup>3</sup> Area D Science with Lab based on professional goals (consult with advisor).

<sup>4</sup> Area D - Math/Science: STAT 1401 Elementary Statistics is recommended.

<sup>5</sup> Internship requires approval.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

Note: Students must have a minimum of 39 semester hours numbered 3000 or higher.

Degree progress is personalized to help student meet educational/occupational goals (most notably with selection of program electives).

## Admission Requirements

Students transferring into the Exercise Science program from another degree program at Columbus State University or from another institution must have a minimum overall grade point average of 2.50 based on a 4.0 scale. Individuals must obtain a change of major form from the Department Chair before entering the program.

## Additional Program Requirements

Graduation Requirements: Satisfactory completion of all Board of Regents, university, and program requirements with a minimum grade of "C" in all EXSC courses applied to graduation.

Students with 7 semester hours in science requirement in Area D must take 2 seminars in Area B. Students with 8 semester hours in science in requirement in Area D need to take only one seminar in Area B.

A grade of "C" or better is required for any EXSC course and all of Areas F, G, and H courses.

Note: Students must have a minimum of 39 semester hours numbered 3000 or above.

## Program Learning Outcomes

- Demonstrate a scientific knowledge base in the discipline of kinesiology
- Communicate the value of physical activity on health, wellness, and / or quality of life.
- Model appropriate professional behaviors.
- Demonstrate ability to plan and implement exercise tests to diverse populations.
- Develop evidence-based exercise prescriptions for diverse populations.

## Kinesiology (BS) - Health & Physical Education Non-Certification Concentration

### Program Overview

The B.S. Kinesiology non certification track prepares community based physical activity professionals to work in various sport, coaching, and movement settings with all age populations. Students are actively engaged in a variety of learning experiences in classrooms, labs, and public schools and have the opportunity to develop their knowledge and skills in a wide variety of physical activities while learning to teach others. Areas of emphasis in this program consist of instructional skills, pedagogical strategies, sport coaching, methods of evaluation in physical activity settings, and field-based experiences.

<sup>1</sup> Prerequisite for BIOL 2221K.

<sup>2</sup> Requires advisor approval.

<sup>3</sup> KINS 4698 Internship 6 to 12 hour option; requires approval.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

## Additional Program Requirements

## Program Learning Outcomes

- Possess a strong knowledge base in the disciplines of health and physical education.
- Demonstrate competence in a variety of physical skills.
- Demonstrate the ability to meet the needs of students of varying ability levels, genders, and racial and cultural backgrounds.
- Identify and apply appropriate physical activity and sport principles in diverse settings.

# Kinesiology (BS) - Health & Physical Education Teacher Certification Concentration

## Program Overview

The B.S. Kinesiology degree with a concentration in Health and Physical Education Teacher Certification prepares students to teach at all grade levels preschool through high school. This program is approved by the Georgia Professional Standards Commission. The program of study is guided in part by the principles of the Interstate New Teacher and Support Consortium and the National Standards for Beginning Physical Education Teachers. Students are actively engaged in a variety of learning experiences in classrooms, labs, and public schools and have the opportunity to develop their knowledge and skills in a wide variety of physical activities while learning to teach others.

Preparation to teach Health and Physical Education in the schools is dynamic. Students are enrolled in classes designed to develop sport skills and knowledge in a variety of physical activities. Extensive laboratory experiences include observations and teaching at all grade levels...preschool, elementary, middle level, and high school...a feature that sets the program apart from many others in the nation. Students are guided in the process of teacher development by a team consisting of local P-12 physical educators and university faculty. Post Baccalaureate and add-on certification options are available.

In addition to the degree requirements, there are further requirements for teaching certification. Visit this page for the certification requirements and process. (<https://cctl.columbusstate.edu/certification.php>)

## Career Opportunities

Recent graduates have found great success in obtaining teaching positions in health and physical education in area schools. Columbus State University graduates are employed as elementary, middle level, and high school physical education teachers and coaches, often with responsibilities for health instruction and the teaching of children with special needs. Graduates of the program are recognized as effective teachers who are committed to the teaching profession. They are also prepared to continue their professional growth through graduate study.

*Effective fall 2015: "Candidates enrolled in initial teacher preparation programs are required to attempt all state-mandated assessments prior to program completion. Candidates will only be recommended for certification by CSU upon successful completion of all program requirements and state-mandated assessments." Emergency Care and First Aid Proficiency: All students must have current certifications in First Aid and CPR (including infant, child, and adult) at the time of application to student teaching. Those certifications must remain current and on file in the SAFE Office through the end of the student teaching term. Students may demonstrate this proficiency by attaining the appropriate certifications from the American Heart Association, the American Red Cross, or by completing KINS 2345 Emergency Care and First Aid. Please note: The skills test for first aid and CPR cannot be taken online.*

| There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course. |                                                                                               |           |

<sup>1</sup> Prerequisite for BIOL 2221K.

<sup>2</sup> Must be admitted to Teacher Education.

<sup>3</sup> Choose which semester.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. Admission to Teacher Education is completed through TK20. For further information please go to

<https://cctl.columbusstate.edu/teacher-education.php>. (<https://cctl.columbusstate.edu/teacher-education.php>)

## Additional Program Requirements

Following admission to the teacher education program, a review is conducted each semester to determine retention in the teacher education program.

## Program Learning Outcomes

- Possess a strong knowledge base in the disciplines of health and physical education
- Demonstrate competence in a variety of physical skills
- Achieve and maintain a health enhancing level of physical fitness
- Apply and reflect on effective teaching behaviors to create positive learning environments in order to plan, implement and assess developmentally appropriate learning experiences and sound progression in P-12 settings and use technology when appropriate
- Demonstrate the ability to meet the needs of students of varying ability levels, genders, and racial and cultural backgrounds

## School of Nursing

The School of Nursing prepares individuals to begin a rewarding career in nursing. The U.S. Department of Labor Statistics has indicated that more than half a million new nurses will be needed to replace those who leave the profession through 2024. CSU's School of Nursing boasts an excellent licensing exam pass rate (over 88%), a 100% employment rate for graduates within 6 months of graduation, highly qualified faculty, low clinical teaching instructor-to-student ratio, technology & media equipped classrooms & campus lab, and authentic hands-on experiences. Many of our professors still practice what they teach, so they are able to create a relevant nursing curriculum.

All nursing programs have full approval from the Georgia Board of Nursing and are accredited by the Commission on Collegiate Nursing Education (CCNE).

The School of Nursing offers the following degrees:

- Family Nurse Practitioner (MSN) (p. 238)
- Nursing (BSN) (p. 239)
- Nursing (MSN) (p. 243)
- Nursing RN-to-BSN (BSN) (p. 245)

## Family Nurse Practitioner (MSN)

### Program Overview

The M.S.N. Family Nurse Practitioner program is designed for the registered BSN nurse to complete a degree conveniently and efficiently while continuing a career.

No commuting to campus

Complete the program in as little as 2 years if you attend full-time (five semesters, 44 semester hrs)

Highly qualified faculty members with various nursing backgrounds who facilitate learning

100% Online Asynchronous courses

Clinical hours completed in your own area (765 clinical hrs are required)

The master's degree program in nursing at Georgia Intercollegiate Consortium for Graduate Nursing Education (Consortium of Columbus State University and Georgia Southwestern University) is accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>) (<http://www.ccnaccreditation.org/>).

The FNP degree has been offered cooperatively by Columbus State University and Georgia Southwestern University. Each institution belongs to the University System of Georgia. The Georgia Intercollegiate Consortium for Graduate Nursing Education (GICGNE) has a mission to prepare safe and competent professional nurses, who in collaboration with others, provide or facilitate high quality patient-centered care in a global society and achieve academic excellence in nursing education through learner centered teaching, evidence based practice, creative inquiry and student engagement. Also, the mission is to prepare competent and caring individuals for a life of success and leadership in professional nursing through intellectual, personal and social growth and to contribute to the communities in which they live and work.

The Board of Regents of the University System of Georgia (USG) has approved the dissolution of the Georgia Intercollegiate Graduate Nursing Education (GICGNE) and for both universities in this consortium to have their own master's of science in nursing programs. For those students enrolled in GICGNE, there will be no change- students will remain enrolled under GICGNE until graduation.

CSU School of Nursing began enrolling new students in the CSU-only program in Spring 2020. The FNP Program will be the same program as offered under GICGNE, including all courses in the degree track. Because the master's degree is only accredited under GICGNE, we will be seeking separate accreditation.

Therefore, the master's degree program in nursing at Columbus State University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>). Applying for accreditation does not guarantee that accreditation will be granted.

Ranked among the top regional universities in the South by U.S. News & World Report with special recognition of its online programs in the College of Education and Health Professions.

The FNP Program is ranked 3<sup>rd</sup> among the 10 Most Affordable Online Nurse Practitioner Degrees by CollegeChoice.net <https://www.collegechoice.net/rankings/cheapest-online-nurse-practitioner-degrees/>

## Career Opportunities

The family nurse practitioner role prepares professional nurses to work in an advanced role as a care provider in hospitals, private practices, schools and colleges, hospice centers, community clinics, Veterans' Administration facilities and private and public health departments. The family nurse practitioner may also choose to work with students in an educational setting.

## Admission Requirements

- Hold a baccalaureate degree in nursing (BSN) from a regionally accredited university and a nationally accredited nursing program (NLNAC or CCNE)
- Minimum grade point average (GPA) of 3.0
- Current unencumbered RN license in the state where clinical course requirements will be met
- Three (3) professional letters of reference
- Resume or Curriculum Vitae (CV) required for admission to the family nurse practitioner program
- Acceptance into the Graduate School at Columbus State University. For more information about graduate programs at CSU go to <http://gradschool.columbusstate.edu> (<http://gradschool.columbusstate.edu/>).

## Additional Program Requirements

The MSN degree is awarded on completion of course work with a 3.0 or better grade point average (GPA), fulfillment of candidacy requirements and successful completion of required course and program requirements.

## Program Learning Outcomes

- Implement the selected advanced nurse role-leader, educator, informaticist, or nurse practitioner- within health care.
- Develop and nurture interprofessional collaborations by communicating and consulting with other health care professionals, including administrators, community leaders and regulators.

- Evaluate the influence of ethical principles on personal and organizational decision-making.
- Utilize nursing research for the promotion of quality nursing education, safe client-centered health care, and evidence-based practice.
- Employ critical thinking in the application of nursing and multidisciplinary theoretical frameworks to foster optimal client health outcomes.
- Exemplify cultural competence and sensitivity to diversity in dynamic academic and health care environments.
- Demonstrate competence in leadership roles and a commitment to ongoing professional development for the provision of quality, cost-effective client-centered health care and the advancement of nursing practice.
- Utilize informatics to improve client outcomes and to promote the health and safety of individuals, groups and communities.

## Nursing (BSN)

### Program Overview

The BSN degree prepares a nurse generalist with a liberal arts background who focuses upon treating human responses to actual or potential health programs. Graduates are expected to meet the program outcomes to function in entry-level nursing practice positions. After successful completion of required core coursework, students enter nursing courses in the fall of their junior year.

#### CSU Nursing Facts:

There are more than 1,000 health science majors focusing on nursing and nursing majors and the numbers continue to increase.

The baccalaureate degree program in nursing is approved by the Georgia Board of Nursing (<https://sos.ga.gov/index.php/licensing/plb/45/>). The baccalaureate degree program in nursing is accredited by:

Commission on Collegiate Nursing Education  
655 K Street, NW, Suite 750  
Washington, DC 20001  
202-887-6791

Our students pass the NCLEX, the national nursing licensure exam, at rates well above national average.

Our faculty provides hands-on experiences to our students. All of our professors are clinical experts in the area in which they teach.

Students get relevant, hands-on experience, in the classroom and in clinical settings.

Low instructor-to-student ratio.

The clinical nursing curriculum is offered over four semesters beginning in the junior year and is preceded by two years of pre-nursing (core) courses.

The PACE Office is the Advising Center for the School of Nursing.

RN to BSN - Online (p. 245)

## Career Opportunities

Graduates are expected to meet the program outcomes to function in entry-level nursing practice positions.

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

<sup>1</sup> Courses are offered as part of an FRLC.

<sup>2</sup> Area B Elective in FRLC will be ITDS 2735 Life and Career Planning.

<sup>3</sup> Behavioral Science Elective and PSYC 1101 Introduction to General Psychology can be taken at any time in the nursing program.

<sup>4</sup> NURS 3279 Applied Pathophysiology must be taken first upon admission to the nursing program which will occur in spring 2020.

<sup>5</sup> PCN III/PCN IV or PCN IV/PCN III sequence.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

**Summer 2021** - NURS 3276 Introduction to Health Assessment and Wellness (Health Assessment) and NURS 3279 Applied Pathophysiology (Pathophysiology) will be offered in the summer term. Eligible students are required to complete BIOL 2222K Human Anatomy and Physiology II by spring 2021 in order to take NURS 3279 Applied Pathophysiology (Pathophysiology) in summer 2021. Eligible students will work with an advisor from the School of Nursing in determining if summer 2021 nursing courses can be taken. Please note that summer 2021 nursing courses are not required, and taking summer 2021 nursing does alter the program map for fall 2021 and spring 2022. Additional information will be provided during the advising process as applicable.

**Fall 2021** - NURS 3175 Pharmacology will be offered for those nursing students who have successfully completed Pathophysiology.

**Jan Term and Spring 2022** - NURS 3175 Pharmacology will be offered in Jan term (for repeaters only) and in spring semester to those admitted in fall.

## Admission Requirements

The School of Nursing accepts one class of nursing students to its program to start each fall term. Admittance to the upper level clinical course sequence each fall is competitive. Acceptance to the nursing program is conducted through a rolling admissions process. Eligible nursing majors are evaluated at the beginning of each semester for possible early acceptance through rolling admission for the upcoming fall cohort.

Students can apply for the Nursing program once they have met the following requirements:

- Completed AREA A, AREA D required sciences (CHEM 1151 Survey of Chemistry I/CHEM 1151L Survey of Chemistry I Lab and CHEM 1152 Survey of Chemistry II/CHEM 1152L Survey of Chemistry II Lab), Area F, and have fewer than nine (9) remaining hours of Core left to complete. Students must meet the terms of the School of Nursing Science Policy
- Students must meet the terms of the School of Nursing Science Policy.
- Students may only FAIL (D or F) or WITHDRAW FAILING (WF) from one Area D/F science course and be allowed to repeat it within five years of acceptance into the Nursing Program. The grade of the AREA D/F science course failure and the grade of the

second attempt of the AREA D/F science course will be averaged and utilized in the program GPA. Failing two science courses (D, F, or WF) will make a student ineligible to apply for five years.

- A science course that was taken more than seven years prior to acceptance into the Nursing Program MUST be repeated and ONLY the grade earned for the repeated course will be used in the nursing GPA.
- Science courses: CHEM 1151/1151L (Survey of Chemistry I), CHEM 1152/1152L (Survey of Chemistry II), BIOL 2221K (Human and Physiology I), BIOL 2222K (Human and Physiology II), BIOL 2225K (Microbiology)
- Maintaining a 3.00 or higher overall GPA
- Pass the "A2 Assessment" test with 70% or greater on the three (3) sections (math, grammar and reading) with 75% average or better
- During the application process, students will also be asked to provide three (3) professional recommendations

The application process begins in January each year for the upcoming fall nursing class.

Application deadlines are provided at <http://nursing.columbusstate.edu/bsn/index.php> (<http://nursing.columbusstate.edu/bsn/>)

## Additional Program Requirements

Requirements for students to progress in clinical nursing course sequence include:

- maintaining 3.00 overall GPA
- successful completion of prerequisites not met before entry into program
- successful completion of required nursing achievement exams
- annual evidence of required immunizations, TB screening, BLS certification, and current professional liability insurance
- eligibility to enter clinical agencies for clinical experiences

Requirements for students to graduate from BSN Program:

- maintaining a 3.00 or higher overall GPA
- successful completion of all university requirements
- successful completion of all BSN program requirements
- students who fail to meet graduation requirements within seven years of their first admission to the nursing program are subject to having all credits reevaluated

## Program Learning Outcomes

- Graduates will provide safe, patient-centered care in a variety of settings.
- Graduates will function as a leader within the nursing roles provider of care, manager of care, and member of the profession.
- Graduates will use sound evidence to make appropriate clinical decisions about health care.
- Graduates will integrate informatics into nursing practice in a variety of settings.
- Graduates will apply the quality improvement process to ensure patient safety and to meet desired clinical outcomes.
- Graduates will communicate and collaborate with members of the interdisciplinary health care team in a professional and effective

manner, through verbal, non-verbal, written and electronic means to improve patient outcomes and teamwork.

- Graduates will apply concepts of safe practice to ensure optimal patient clinical outcomes.

## Nursing (MSN)

### Program Overview

The M.S.N. is an online degree which has been offered cooperatively by Columbus State University and Georgia Southwestern University. Each institution belongs to the University System of Georgia. The Georgia Intercollegiate Consortium for Graduate Nursing Education (GICGNE) has a mission to prepare safe and competent professional nurses, who in collaboration with others, provide or facilitate high quality patient-centered care in a global society and achieve academic excellence in nursing education through learner centered teaching, evidence based practice, creative inquiry and student engagement. Also, the mission is to prepare competent and caring individuals for a life of success and leadership in professional nursing through intellectual, personal and social growth and to contribute to the communities in which they live and work. The master's degree program in nursing at Georgia Intercollegiate Consortium for Graduate Nursing Education (Consortium of Columbus State University and Georgia Southwestern University) is accredited by the Commission on Collegiate Nursing Education (<http://www.ccneaccreditation.org>) (<http://www.ccneaccreditation.org/>).

The Board of Regents of the University System of Georgia (USG) has approved the dissolution of the Georgia Intercollegiate Graduate Nursing Education (GICGNE) and for both universities in this consortium to have their own master's of science in nursing programs. For those students enrolled in GICGNE, there will be no change- students will remain enrolled under GICGNE until graduation.

CSU School of Nursing began enrolling new students in the CSU-only M.S.N. program in Spring 2020. This will include students in all tracks of informatics, education, or leadership. The MSN program will be the same program as offered under GICGNE, including all courses in each degree track. Because the master's degree is only accredited under GICGNE, we will be seeking separate accreditation.

Therefore, the master's degree program in nursing at Columbus State University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (<http://www.ccneaccreditation.org>). Applying for accreditation does not guarantee that accreditation will be granted.

The 36-38 hour program prepares professional registered nurses for advanced practice nursing roles. These include three separate tracks: the nurse educator, nurse leader, and nurse informaticist.

Nursing education concentration prepares nurses to facilitate learning in various environments through the application of knowledge in instructional design, curriculum development, technology utilization, and evaluation of learning.

Leadership concentration prepares nursing leaders who are able to influence, design, manage, transform, and evaluate the evolution of nursing services and care delivery.

Informatics concentration prepares graduates who are proficient in health information technology and essential informatics competencies to function within health care environments.

## Career Opportunities

The nurse educator role prepares professional nurses to assume entry-level teaching positions in collegiate and hospital settings, as well as community settings with staff or patients. You will also have a clinical focus which will enable to use this in teaching positions with students, staff members, and patients. Roles within Nurse Educator practice include:

- Educator in collegiate or post secondary setting
- Health educator
- Program planner
- Staff educator
- Patient educator
- Researcher
- Collaborator
- Consultant
- Case manager
- Practitioner
- Health care provider

The nurse informaticist role prepares professional nurses to work in hospitals, clinics, and community health setting to provide systems preparation and development as well as training and continued support for users. You may also work in industries related to sales, systems design, and training those who will use technology.

The nurse leader role prepares professional nurses to work in management or administration settings such as hospitals, community agencies, long-term care facilities, governmental agencies and facilities, industries and corporations.

## Admission Requirements

- Baccalaureate degree in nursing (BSN) from a regionally accredited university and a nationally accredited nursing program (NLNAC or CCNE)
- Minimum grade point average (GPA) of 3.0 (regular admission) or 2.75 (provisional admission)
- Current unencumbered RN license in the state where clinical course requirements will be met
- Three (3) professional letters of reference
- Acceptance into the Graduate School at Columbus State University

Students who do not meet GPA and/or GRE minimal admission requirements may be admitted on a provisional basis. They must maintain a 3.0 GPA in their coursework once admitted into the program.

## Additional Program Requirements

The MSN degree is awarded on completion of course work with a 3.0 or better grade point average (GPA), fulfillment of candidacy requirements and successful completion of required course and program requirements.

## Program Learning Outcomes

- Implement the selected advanced nurse role-leader, educator, informaticist, or nurse practitioner- within health care.
- Develop and nurture interprofessional collaborations by communicating and consulting with other health care professionals, including administrators, community leaders and regulators.
- Evaluate the influence of ethical principles on personal and organizational decision-making.
- Utilize nursing research for the promotion of quality nursing education, safe client-centered health care, and evidence-based practice.
- Employ critical thinking in the application of nursing and multidisciplinary theoretical frameworks to foster optimal client health outcomes.
- Exemplify cultural competence and sensitivity to diversity in dynamic academic and health care environments.
- Demonstrate competence in leadership roles and a commitment to ongoing professional development for the provision of quality, cost-effective client-centered health care and the advancement of nursing practice.
- Utilize informatics to improve client outcomes and to promote the health and safety of individuals, groups and communities.

## Nursing RN-to-BSN (BSN)

### Program Overview

This program is designed for the registered nurse to complete a degree conveniently and efficiently while continuing a career.

For Registered Nurses seeking a BSN degree

12 month program

May enter program year round

Small, interactive classes offered in 7 week sessions

100% didactic portion online

Community clinicals in your geographical area

Dedicated RN-BSN advisor

Core and nursing pre-requisite courses (63 hours), Nursing 60 hours, (32 credits are awarded once successful completion of NURS 3191 and completing 6.67 credits of nursing courses).

No commuting to campus

100% employment rate for graduates

Asynchronous classes

Highly qualified faculty members with various nursing backgrounds who facilitate learning

Ranked among the top regional universities in the South by U.S. News & World Report with special recognition of its online programs in the College of Education and Health Professions

The baccalaureate degree program in nursing is approved by the Georgia Board of Nursing (<http://sos.ga.gov/index.php/licensing/plb/45/>). The baccalaureate degree program in nursing is accredited by the:

Commission on Collegiate Nursing Education  
655 K Street, NW, Suite 750  
Washington, DC 20001  
202-887-6791

## Career Opportunities

This program is designed for the registered nurse to complete a degree conveniently and efficiently while continuing a career.

## Program of Study Core Requirements

| Code                                            | Title                                                                | Credit Hours |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Program Map

### CURRICULUM SCHEMA: RN-BSN PROGRAM

Click here to view the RN-BSN program map ([https://catalog.columbusstate.edu/academic-units/education-health-professions/nursing/nursing-rn-bsn/RN\\_to\\_BSN\\_Program\\_Map\\_2021-2022\\_rev.pdf](https://catalog.columbusstate.edu/academic-units/education-health-professions/nursing/nursing-rn-bsn/RN_to_BSN_Program_Map_2021-2022_rev.pdf))

Lower Division Course Requirements - Total Credits: 63

Upper Division Course Requirements - Total Credits: 60

123 total credit hours

## Admission Requirements

- Admission to Columbus State University. All transcripts must be sent to Columbus State University's Office of Admissions.
- Hold a valid nursing license.
- Earn the minimum nursing grade point average (GPA) (2.5 based on a 4.0 scale). Calculated on pre-requisite courses required for the nursing degree.
- A grade of C or better in all required science courses and labs.
- Graduate of an accredited Associate Degree Program.

Exclusion from other nursing programs may prohibit your admission.

## Additional Program Requirements

A BSN degree is awarded on completion of course work and fulfillment of candidacy requirements.

## Program Learning Outcomes

- Graduates will provide safe, patient-centered care in a variety of settings.
- Graduates will function as a leader within the nursing roles provider of care, manager of care, and member of the profession.
- Graduates will use sound evidence to make appropriate clinical decisions about health care.
- Graduates will integrate informatics into nursing practice in a variety of settings.
- Graduates will apply the quality improvement process to ensure patient safety and to meet desired clinical outcomes.
- Graduates will communicate and collaborate with members of the interdisciplinary health care team in a professional and effective manner, through verbal, non-verbal, written and electronic means to improve patient outcomes and teamwork.
- Graduates will apply concepts of safe practice to ensure optimal patient clinical outcomes.

## College of Letters & Sciences

The College of Letters and Sciences is the academic heart of Columbus State University, offering most of the General Education core; undergraduate programs in the sciences, mathematics, humanities, and social sciences; and master's degrees in history, natural sciences, public administration, and public safety administration. Students completing degrees in our programs pursue careers in such diverse fields as law, education, food science, medicine, scientific research, and criminal justice.

With the growing need for experts in these fields, the College of Letters and Sciences grows every year with new students, new faculty, and new programs. For example, we recently launched a new Food Science track in the Chemistry program and certificate and minor programs in data analytics. We have plans to increase our offerings in the Masters of Public Administration Program by adding areas in Criminal Justice, Homeland Security and Political Management. The College of Letters and Sciences prioritizes a student-centered focus to meet the diverse needs of the students by offering challenging programs, an engaged faculty, and a vibrant, globally connected campus culture.

Another way in which we promote a student-centered approach is through our faculty professional development – our Faculty are encouraged to provide hands-on learning experiences for students that blend academic rigor with practical applications. Hence, our students are active in undergraduate and graduate research and creative inquiry. In addition, we offer a large number of classes that are small enough to place students face-to-face with internationally renowned experts; our students explore the unique geological terrain of our region, examine the literary works of the masters, apply mathematics to solve problems from industry, and travel abroad.

## Departments

## Admission Requirements

Applicants must currently be in a supervisory or managerial position in a public safety agency, with significant responsibilities in the areas of management of personnel, interpretation of policies or supervision of other crucial agency functions.

## Additional Program Requirements

The Command College brings together leaders in corporate and public management to provide public safety executives with intense training in the best available management theory and practice, to render innovative solutions to organizational problems and to address important issues in managing public service organizations effectively.

Students enrolled in Command College attend twelve (12) intensive cohort sessions of classes over a two-year period, completing 460 hours of classes divided into 40-hour modules:

- Leadership in Public Safety Administration
- Human Resource Management and Development
- Fiscal Management and Public Finance
- Legal Issues and Trends in Public Safety Administration
- Strategic Planning and Policy Development
- Organizational and Management Realities
- Research in Public Safety Administration
- Five (5) Auxiliary Courses

Completion of each module/course will provide POST training and 3 semester hours of academic credit.

## Program Learning Outcomes

Completion of this degree program will provide graduates with the skills to lead public service agencies effectively. Specifically, graduates will

- Describe and assess, in writing and in class discussions, the central concepts of human resource management.
- Identify and assess, in writing, trends in civil and legal liabilities.
- Develop mock strategic plans and effectively assess existing strategic plans embedded in case studies.
- Apply the central concepts of efficient administration in the context of case studies.
- Apply a standard of ethics and fairness amid political, legal, fiscal, and cultural complexities presented in case studies.
- In a semester long research project, identify, assess, and develop a plan that uses the type of data that can inform executive-level decisions in public safety agencies.

## Department of Biology

The Department of Biology has a friendly atmosphere, with outgoing faculty who teach, advise, and collaborate with students to help them meet their goals. In biology courses, learning by doing is the guiding philosophy, as biology majors use cutting-edge techniques in classrooms with state-of-the-art equipment. Biology majors are individually advised, initially through CSU Advise and later by faculty members, who guide students through their coursework and help them plan for careers or graduate education. Many biology majors also work with faculty on research projects. Such experiences enrich the academic careers of students. Many biology majors have won awards for their research at regional and national scientific meetings. In addition, our student organizations— Tri-Beta Biological Honor Society (BBB), American Medical Student Association (AMSA) and American Pre-Veterinary Medical Association— provide students with career specific enrichment, service, and leadership opportunities.

The Department of Biology offers the following degrees:

- Biology (BA) (p. 249)
- Biology (BA) - Secondary Education Track (p. 254)
- Biology (BS) (p. 259)
- Biology (BS) - Secondary Education Track (p. 264)
- Natural Sciences (MS) - Biology Track (p. 270)

## Biology (BA)

### Program Overview

The BA in Biology is more flexible than the BS and allows students to tailor their degree to their own interests. A minor or a prescribed course of study outside of biology is required.

### Career Opportunities

Career opportunities are available in the following areas: conservation, medicine, pharmacy, biotechnology, research, genetic counseling, veterinary medicine.

| <b>Total Credit Hours</b>                                                   | <b>45</b> |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                                       | Title                 | Credit Hours |
|------------------------------------------------------------|-----------------------|--------------|
| <b>Core Requirements</b>                                   |                       |              |
| Complete the core requirements for this program            |                       | 45           |

<sup>1</sup> Notes: MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

In order to declare a major in biology, a student is required to have an overall GPA of 2.5.

## Additional Program Requirements

Students must receive a grade of "C" or better for all classes in Areas D, F, G, and H. Classes with grades lower than a "C" cannot be used to satisfy prerequisite requirements for courses required in the major. To complete a degree in biology, students must obtain a minimum overall grade point average of 2.0 in all science courses applied to graduation.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods in four core areas: cell biology; molecular biology and genetics; organismal biology; and population biology, evolution, and ecology.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report research results and conclusions according to accepted standards of professional biologists.
- Demonstrate knowledge of careers in biology.

- Complete a minor or a prescribed course of study in order to develop knowledge and understanding in a discipline other than biology.

## Biology (BA) - Secondary Education Track

### Program Overview

This degree combines broad training in biology with preparation for K-12 teaching through UTeach Columbus (<https://uteach.columbusstate.edu/>).

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CCTL) website for detailed information about certification requirements and the certification process.

### Career Opportunities

Middle or high school teaching in biology

### Program of Study

<sup>1</sup> There is a recent rule change for certification from the Georgia Professional Standards Commission. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219 This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

<sup>1</sup> If ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is not taken in Area C.

<sup>2</sup> At least one course must include lab and/or field experience.

## Program Map

### Suggested four year course schedule with MATH 0999C or MATH 0999B

| Course            | Title                                                                                            | Credit Hours |
|-------------------|--------------------------------------------------------------------------------------------------|--------------|
| <b>First Year</b> |                                                                                                  |              |
| <b>Fall</b>       |                                                                                                  |              |
| Area B2           | ITDS 1779 (2), LEAD 1705 (2), PERS 1506 (1; may be repeated with different topic), PERS 1507 (2) | 1            |

| <p>There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.</p> |                                                                                        |            |

<sup>1</sup> MATH 1111 College Algebra has 3 credits. Count 2 credits in Area F and 1 credit in Area I.

<sup>2</sup> MATH 0999B (2 credits) or MATH 0999C (1 credit) do not count toward the degree. These courses are support courses, if needed, for MATH 1111 College Algebra.

<sup>3</sup> MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.

<sup>4</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is recommended in Area C Humanities.

## Suggested four year course schedule with MATH 1111 College Algebra.

| SPED 4115 | Teaching Math and Science to Exceptional Learners (minimum grade of C; see note below) | 2 |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

|                           |                                               |            |

| <p>There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.</p> |                                                                                        |            |

| <b>Total Credit Hours</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                        | <b>123</b> |

- <sup>1</sup> MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.
- <sup>2</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is recommended in Area C Humanities.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

In order to declare a major in biology, a student is required to have an overall GPA of 2.5. During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. Application is made to the COEHP Office of Student Advising and Field Experiences. For a list of current admission requirements, go to [https://safe.columbusstate.edu/teacher\\_ed.php](https://safe.columbusstate.edu/teacher_ed.php).

## Additional Program Requirements

Students must receive a grade of "C" or better for all classes in Areas D, F, G, and H. Classes with grades lower than a "C" cannot be used to satisfy prerequisite requirements for courses required in the major. To complete a degree in biology, students must obtain a minimum overall grade point average of 2.0 in all science courses applied to graduation. For teacher certification, students must obtain a minimum overall and CSU grade point average of 2.5. Prior to the student teaching semester, students must meet all requirements for admission to Student Teaching. For a list of current requirements, go to [https://safe.columbusstate.edu/stu\\_teach.php](https://safe.columbusstate.edu/stu_teach.php).

To be recommended for teacher certification, students must pass the GACE Biology Test I and Test II (for additional information on the GACE, go to <https://gace.ets.org/>).

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods in four core areas: cell biology; molecular biology and genetics; organismal biology; and population biology, evolution, and ecology.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.

- Report research results and conclusions according to accepted standards of professional biologists.
- Demonstrate knowledge of careers in biology.
- Complete a course of study in secondary education as preparation for a career in teaching biology in middle or high school.
- Demonstrate proficiency in planning instruction based on standards and knowledge of students.
- Demonstrate proficiency in using a wide range of instructional strategies and differentiating instruction to help all students learn.
- Demonstrate proficiencies related to assessing learning and teaching and using assessment data to adapt instruction for improved student learning.
- Display values, commitments, dispositions, and habits associated with effective and professional teaching.

## Biology (BS)

### Program Overview

This program provides broad training in biology and preparation for graduate and professional studies and for a career in biology.

### Career Opportunities

Career opportunities are available in the following areas: conservation, medicine, pharmacy, biotechnology, research, genetic counseling, veterinary medicine.

### Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

<sup>1</sup> MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

In order to declare a major in biology, a student is required to have an overall GPA of 2.5.

## Additional Program Requirements

Students must receive a grade of "C" or better for all classes in Areas D, F, G, and H. Classes with grades lower than a "C" cannot be used to satisfy prerequisite requirements for courses required in the major. To complete

a degree in biology, students must obtain a minimum overall grade point average of 2.0 in all science courses applied to graduation.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods in four core areas: cell biology; molecular biology and genetics; organismal biology; and population biology, evolution, and ecology.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of professional biologists. Demonstrate knowledge of careers in biology.

## Biology (BS) - Secondary Education Track

### Program Overview

This degree combines broad training in biology with preparation for K-12 teaching through UTeach Columbus (<https://uteach.columbusstate.edu/>).

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

### Career Opportunities

Middle or high school teaching in biology

### Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

### Core Requirements

| Code                                             | Title                                             | Credit Hours |

Area E Total 12

#### Wellness Requirement

Select one of the following: 3

KINS 1106 Lifetime Wellness  
or PHED 120 Concepts of Fitness

Select one PEDS course (p. 615)

Wellness Total 3

**Total Credit Hours 45**

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

#### Major Requirements

| Code | Title | Credit Hours |
|------|-------|--------------|
|------|-------|--------------|

#### Core Requirements

Complete the core requirements for this program 45

#### Area F Courses Related to Major

Minimum grade of C is required

BIOL 1231K General Biology I 4

BIOL 1232K General Biology II 4

BIOL 2206K Organismic Biology I 4

BIOL 2207K Organismic Biology II 4

Apply additional hour from Area A Math 1

Select 1 credit of General Electives 1

Area F Total 18

#### Area G Program Requirements

Minimum grade of C is required.

BIOL 3215K Cell Biology 4

BIOL 3216K Genetics 4

BIOL 3217K Ecology 4

BIOL 4005 Biology Portfolio 0

BIOL 4795 Capstone Senior Seminar 2

MATH 1111 College Algebra 3

Use a general elective to substitute for MATH 1111 if shown to be math ready at a higher level.

Select the following UTeach Columbus Courses (only two attempts allowed for each of the following courses):

SPED 4115 Teaching Math and Science to Exceptional Learners (Effective with the 2022-2023 catalog, a minimum grade of B is required) <sup>1</sup> 2

UTCH 1201 Step I: Inquiry Approaches to Teaching 1

UTCH 1202 Step II: Inquiry-Based Lesson Design 1

UTCH 2105 Knowing and Learning in Mathematics and Science 3

UTCH 2215 Research Methods 3

| UTCH 4205                 | Project-Based Instruction (minimum grade of C)                                         | 3         |
| <b>Credit Hours</b>       |                                                                                        | <b>15</b> |
| <b>Spring</b>             |                                                                                        |           |
| BIOL 4005                 | Biology Portfolio                                                                      | 0         |
| SPED 4115                 | Teaching Math and Science to Exceptional Learners (minimum grade of C; see note below) | 2         |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

|                           |                                               |            |
|---------------------------|-----------------------------------------------|------------|
| UTCH 4485                 | Student Teaching (minimum grade of C)         | 9          |
| UTCH 4795                 | Student Teaching Seminar (minimum grade of C) | 1          |
| <b>Credit Hours</b>       |                                               | <b>12</b>  |
| <b>Total Credit Hours</b> |                                               | <b>123</b> |

- <sup>1</sup> MATH 1111 College Algebra has 3 credits. Count 2 credits in Area F and 1 credit in Area I.
- <sup>2</sup> MATH 0999B (2 credits) or MATH 0999C (1 credits), if required with MATH 1111, do not count toward the degree. These are College Algebra support classes that improve your chances of passing MATH 1111 College Algebra.
- <sup>3</sup> MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.
- <sup>4</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is recommended in Area C Humanities.

### Suggested four year course schedule with MATH 1111 College Algebra

| Course              | Title                                                                                            | Credit Hours |
|---------------------|--------------------------------------------------------------------------------------------------|--------------|
| <b>First Year</b>   |                                                                                                  |              |
| <b>Fall</b>         |                                                                                                  |              |
| Area B2             | ITDS 1779 (2), LEAD 1705 (2), PERS 1506 (1; may be repeated with different topic), PERS 1507 (2) | 1            |
| AREA C              | Fine Arts                                                                                        | 3            |
| BIOL 1231K          | General Biology I (minimum grade of C)                                                           | 4            |
| BIOL 1715           | Professionalism and Careers in Biology (Area I recommended course)                               | 1            |
| ENGL 1101           | English Composition I (minimum grade of C)                                                       | 3            |
| MATH 1111           | College Algebra (minimum grade of C) <sup>1</sup>                                                | 3            |
| <b>Credit Hours</b> |                                                                                                  | <b>15</b>    |
| <b>Spring</b>       |                                                                                                  |              |
| BIOL 1232K          | General Biology II (minimum grade of C)                                                          | 4            |
| CHEM 1211 & 1211L   | Principles of Chemistry I and Principles of Chemistry I Lab (minimum grade of C)                 | 4            |
| ENGL 1102           | English Composition II (minimum grade of C)                                                      | 3            |
| MATH 1113           | Pre-Calculus (minimum grade of C) <sup>2</sup>                                                   | 4            |
| <b>Credit Hours</b> |                                                                                                  | <b>15</b>    |
| <b>Second Year</b>  |                                                                                                  |              |

| Area B1    | COMM 1110 Public Speaking or foreign language 1001, 1002, 2001, 2002 | 3 |
| Area I     | Elective                                                             | 2 |
| UTCH 2105  | Knowing and Learning in Mathematics and Science (minimum grade of C) | 3 |
| UTCH 2215  | Research Methods (minimum grade of C)                                | 3 |

**Credit Hours** **15**

#### Spring

|            |                                                          |   |
|------------|----------------------------------------------------------|---|
| AREA E     | Behavioral Science                                       | 3 |
| Area H     | Organismal Elective (minimum grade of C)                 | 4 |
| AREA H     | BIOL Cell/Molecular Senior Elective (minimum grade of C) | 4 |
| BIOL 3217K | Ecology (minimum grade of C)                             | 4 |
| UTCH 3205  | Classroom Interactions (minimum grade of C)              | 3 |

**Credit Hours** **18**

### Fourth Year

#### Fall

|                        |                                                             |   |
|------------------------|-------------------------------------------------------------|---|
| BIOL 4795              | Capstone Senior Seminar (minimum grade of C)                | 2 |
| AREA H                 | BIOL Ecology/Evolution Senior Elective (minimum grade of C) | 4 |
| HIST 2111 or HIST 2112 | U. S. History to 1865 or U. S. History since 1865           | 3 |
| POLS 1101              | American Government                                         | 3 |
| UTCH 4205              | Project-Based Instruction (minimum grade of C)              | 3 |

**Credit Hours** **15**

### Spring

|           |                                                                                        |   |
|-----------|----------------------------------------------------------------------------------------|---|
| BIOL 4005 | Biology Portfolio                                                                      | 0 |
| SPED 4115 | Teaching Math and Science to Exceptional Learners (minimum grade of C; see note below) | 2 |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

|           |                                               |   |
|-----------|-----------------------------------------------|---|
| UTCH 4485 | Student Teaching (minimum grade of C)         | 9 |
| UTCH 4795 | Student Teaching Seminar (minimum grade of C) | 1 |

**Credit Hours** **12**

**Total Credit Hours** **123**

- <sup>1</sup> MATH 1111 College Algebra has 3 credits. Count 2 credits in Area F and 1 credit in Area I.
- <sup>2</sup> MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.
- <sup>3</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is recommended in Area C Humanities.

## Suggested four year course schedule with MATH 1113 Pre-Calculus or higher

| Course              | Title                                                                                            | Credit Hours |
|---------------------|--------------------------------------------------------------------------------------------------|--------------|
| <b>First Year</b>   |                                                                                                  |              |
| <b>Fall</b>         |                                                                                                  |              |
| Area B2             | ITDS 1779 (2), LEAD 1705 (2), PERS 1506 (1; may be repeated with different topic), PERS 1507 (2) | 1            |

| SPED 4115 | Teaching Math and Science to Exceptional Learners (minimum grade of C; see note below) | 2 |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

| <b>Total Credit Hours</b> | <b>123</b> |
|---------------------------|------------|

<sup>1</sup> MATH 1113 Pre-Calculus has 4 credits. Count 3 credits in Area A and 1 credit in Area I.

<sup>2</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is recommended in Area C Humanities.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

In order to declare a major in biology, a student is required to have an overall GPA of 2.5. During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. Application is made to the COEHP Center for Quality Teaching and Learning (<https://cqt.columbusstate.edu/>). For a list of current admission requirements, go to <https://cqt.columbusstate.edu/teacher-education.php>.

## Additional Program Requirements

Students must receive a grade of "C" or better for all classes in Areas D, F, G, and H. Classes with grades lower than a "C" cannot be used to satisfy prerequisite requirements for courses required in the major.

To complete a degree in biology, students must obtain a minimum overall grade point average of 2.0 in all science courses applied to graduation.

For teacher certification, students must obtain a minimum overall and CSU grade point average of 2.5.

Prior to the student teaching semester, students must meet all requirements for admission to Student Teaching. For a list of current requirements, go to <https://cqtl.columbusstate.edu/student-teaching.php>.

To be recommended for teacher certification, students must pass the GACE Biology Test I and Test II (for additional information on the GACE, go to <https://gace.ets.org/>).

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods in four core areas: cell biology; molecular biology and genetics; organismal biology; and population biology, evolution, and ecology.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report research results and conclusions according to accepted standards of professional biologists.
- Demonstrate knowledge of careers in biology.
- Complete a course of study in secondary education as preparation for a career in teaching biology in middle or high school.
- Demonstrate proficiency in planning instruction based on standards and knowledge of students.
- Demonstrate proficiency in using a wide range of instructional strategies and differentiating instruction to help all students learn.
- Demonstrate proficiencies related to assessing learning and teaching and using assessment data to adapt instruction for improved student learning.
- Display values, commitments, dispositions, and habits associated with effective and professional teaching.

## Natural Sciences (MS) - Biology Track

### Program Overview

The M.S. in Natural Sciences program develops a broad-based scientific background in one of four tracks: Biology, Chemistry, Environmental Science, Geosciences. The program also develops the research skills necessary to design and conduct original research.

The opportunity to take graduate courses in a specific track or combine graduate courses from each of the tracks allows the student to design a graduate course of study to suit his or her own specific interests and goals. The two-year curriculum allows students to focus on required courses and complete research in a timely manner. Graduate

assistantship employment opportunities provide tuition and competitive stipends.

The Natural Sciences Program has:

Broadly trained faculty with diverse areas of expertise with regional, national and international research programs.

Well-equipped, modern laboratories as well as access to protected natural areas.

A wide variety of study-abroad courses that allow students to conduct research projects abroad.

The Master of Science in Natural Sciences Biology Track emphasizes development of a broadly-based scientific background as well as research skills necessary to design and conduct original research. The opportunity to take graduate courses in biology and focus in a specific sub-discipline of biology or combine graduate courses from geology and environmental sciences allows the student to design a graduate course of study to suit his or her own specific interests and goals.

In the first year, students take courses stressing communication skills necessary to present reports and research results, research design and data analyses as well as electives allowing specialization in particular areas of interest. Students select a three-member faculty advisory committee to guide their course options. One faculty member from the advisory committee will serve as the faculty mentor.

## Career Opportunities

Graduates of the program will be able to pursue a broad range of careers in the natural sciences. Common areas of employment include public agencies, non-profit organizations, government service, and private business. Students will also be prepared to move into a doctoral-level degree program.

## Admission Requirements

In addition to the Columbus State University Graduate School Admissions requirements, all interested applicants must submit the following materials to be considered for admission for all tracks in the Natural Sciences program.

- Baccalaureate degree from an accredited college or university, demonstrated excellent preparation in the Biological, Chemical, Environmental and/or Geological Sciences or permission of the program director.
- Undergraduate grade point average of at least 3.0 on a 4.0 scale.
- A minimum combined score of 290 on the verbal and quantitative portions of the Graduate Record Exam. The GRE must have been taken in the last five years.
- A one page statement of experience and interests.

- Two letters of reference. References should come from persons familiar with the applicant's academic or professional experience

## Additional Program Requirements

The maximum course load for a graduate student in a given semester is 12 semester hours. The maximum course load for a student holding a graduate assistantship is 10 semester hours.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods within the core discipline of the Natural Sciences: biology, chemistry, environmental science, and geosciences.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of the chosen area of core study.

## Department of Chemistry

The Department of Chemistry provides a variety of exciting opportunities for students to engage in while progressing through the chemistry program. We offer a broad range of baccalaureate degrees in chemistry to prepare students for careers in teaching, medicine, forensics, research, and/or graduate studies in chemistry. Our classes are well structured and are conducted by a dynamic, world class, faculty who are dedicated to the success of each student. Moreover, our students work closely with the faculty on cutting-edge research projects in all areas of chemistry whereby they are able to obtain invaluable one-on-one training. Additionally, we encourage our students to present their research findings at state, regional, and national conferences to enhance and solidify their professional growth and development. The program is certified by the American Chemical Society, which is the largest national scientific organization in the world.

The Department of Chemistry offers the following degrees:

- Chemistry (BA) - Biochemistry Track (p. 271)
- Chemistry (BA) - Chemistry and Secondary Education Track (p. 275)
- Chemistry (BS) (p. 279)
- Chemistry (BS) - ACS Certified Track (p. 283)
- Chemistry (BS) - Food Science Track (p. 287)
- Chemistry (BS) - Forensic Track (p. 290)
- Natural Sciences (MS) - Chemistry (p. 294)

## Chemistry (BA) - Biochemistry Track Program Overview

The Biochemistry degree track is designed for students interested in going to medical, dental, or pharmacy school. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, mathematics, physics, and biology. This track has fewer required chemistry and math courses and less laboratory time than the B.S. program. These courses provide a broad foundation in the field and permit flexibility for evolving and changing student interests. A broad range of upper-level elective courses exists to expose students to modern

fields within the chemical sciences, and to help students broaden their college experience.

Career Opportunities

Students majoring in chemistry may pursue careers as teachers, entry level chemist, and medicine.

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

Area G Total 45

**Area H Program Electives**

Students must have a grade of C or better in the course used to satisfy the major.

Choose 15 credits from the following courses (6 credits must be chemistry courses). Students are strongly encouraged to take CHEM 1715 their Freshman year. 15

|            |                                                                                       |
|------------|---------------------------------------------------------------------------------------|
| CHEM 1715  | Introductory Chemistry Seminar                                                        |
| BIOL 2221K | Human Anatomy and Physiology I                                                        |
| BIOL 2222K | Human Anatomy and Physiology II                                                       |
| CHEM 3346  | Biochemistry II Lab ( )                                                               |
| CHEM 3555  | Selected Topics in Chemistry                                                          |
| CHEM 3698  | Internship (may be taken for a maximum of 4 hours of credit towards satisfying major) |
| CHEM 4112  | Physical Chemistry II                                                                 |
| CHEM 4185  | Food Chemistry                                                                        |

|            |                                                                                                              |
|------------|--------------------------------------------------------------------------------------------------------------|
| CHEM 4312  | Physical Chemistry II Lab                                                                                    |
| CHEM 4899  | Supervised Undergraduate Research (may be taken for a maximum of 4 hours of credit towards satisfying major) |
| CHEM 5105U | Polymer Chemistry                                                                                            |
| CHEM 5115U | Spectroscopic Identification of Organic Compounds                                                            |
| CHEM 5116U | Catalysis                                                                                                    |
| CHEM 5555U | Selected Topics in Chemistry (may be repeated for credit with different course topic)                        |

Additional courses in astronomy, biology, computer science, geology, mathematics, or engineering may be selected as approved by advisor and department chair.

- 1 The Principles of Chemistry sequence are offered each semester and summer. These must be completed by the summer.
- 2 This course can be taken Fall 1 or Spring 1, depending on when course is offered.
- 3 Organic Chemistry 1 and the co-requisite lab are only offered in the fall semester.
- 4 Organic Chemistry 2 and the co-requisite lab are only offered in the spring semester.
- 5 Quantitative Chemical Analysis and the co-requisite lab are only offered in the fall semester.
- 6 Instrumental Analysis and the co-requisite lab are only offered in the spring semester.
- 7 Program electives may include additional 3000 level courses in biology, physics, engineering,...etc.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To graduate, a student must have 39 credits of upper-division courses (3000 level or higher). These courses may be in any discipline.
- A grade of "C" or higher is required for all chemistry courses.
- The prerequisite for Principles of Chemistry 1 (CHEM 1211 Principles of Chemistry I) and its co-requisite lab is College Algebra (MATH 1111 College Algebra) with a grade of "C" or higher or placement in MATH 1113 Pre-Calculus or higher.
- Introductory Physics 1 and 2 with the co-requisite labs are required for completion of the B.A. in chemistry.
- The prerequisite for Introductory Physics 1 (PHYS 1111 Introductory Physics I) and its lab is pre-calculus (MATH 1113 Pre-Calculus) or higher.
- The prerequisite for Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311) with a "C" or higher in each.
- The prerequisite for Biochemistry 1 (CHEM 3141 Biochemistry I) and its co-requisite lab (CHEM 3345 Biochemistry Lab I) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.

- The prerequisite for Inorganic Chemistry (CHEM 3135 Inorganic Chemistry) and its co-requisite lab (CHEM 3335 Inorganic Chemistry Lab) are Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) with a "C" or higher.
- The prerequisite for Foundations of Physical Chemistry (CHEM 4115 Foundations of Physical Chemistry and its co-requisite lab (CHEM 4315 Foundations of Physical Chemistry Lab are Calculus 1 (MATH 1131 Calculus with Analytic Geometry I) and Introductory Physics 2 (PHYS 1112 Introductory Physics II) and its lab with a "C" or higher.
- Foundations of Physical Chemistry lecture and lab may be offered at night, i.e. 4:30 - 5:45 for the lecture and 6:00 - 8:50 for lab.
- The prerequisite for Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab are Quantitative Chemical Analysis (CHEM 2115 Quantitative Chemical Analysis) and its co-requisite lab (CHEM 2315 Quantitative Chemical Analysis Lab), Organic Chemistry 2 and its co-requisite Lab (CHEM 3312 Organic Chemistry II Lab), and Calculus 1 (MATH 1131 Calculus with Analytic Geometry I). A minimum grade of "C" or higher is required to satisfy the prerequisite requirement.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Organic Chemistry 1 and its co-requisite lab (CHEM 3111 Organic Chemistry I and CHEM 3311 Organic Chemistry I Lab) are only offered in the fall semester and Organic Chemistry 2 with its co-requisite lab (CHEM 3112 Organic Chemistry II and CHEM 3312 Organic Chemistry II Lab) are only offered in the spring semester.
- Quantitative Analysis and its co-requisite lab (CHEM 2115 Quantitative Chemical Analysis and CHEM 2315 Quantitative Chemical Analysis Lab) are only offered in the fall semester.
- Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab) are only offered in the spring semester.
- Supervised Undergraduate Research (CHEM 4899 Supervised Undergraduate Research) is offered as a 1, 2, or 3 credit hour course. The course may be repeated with a different topic up to 9 credits.
- Additional courses in astronomy, biology, chemistry, computer science, engineering, geology, or mathematics courses may be selected as program electives (area H) as approved by advisor and the department chair. At least 6 hours must be chemistry courses.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students will apply both the theoretical and practical principles of the analytical, inorganic, organic and physical divisions of chemistry.
- Students will conduct experiments, analyze data, and interpret results, while using safe and ethical lab practices.
- Students will demonstrate the correct operation of chemical instrumentation.

- Students will apply both the theoretical and practical principles of cellular biology.

# Chemistry (BA) - Chemistry and Secondary Education Track

## Program Overview

The Chemistry and Secondary Education degree track is offered in collaboration with the College of Education and Health Professions. This track is designed for students with an interest in teaching chemistry at the secondary level or pursuing graduate studies in chemical or science education. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, mathematics, physics, and education. The education components of the track are offered through an innovative teacher preparation program (UTeach Columbus (<http://uteach.columbusstate.edu/>)). A broad range of upper-level elective courses in chemistry exists to expose students to modern fields within the chemical sciences and to help students broaden their understanding of science education.

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

## Career Opportunities

Students majoring in chemistry may pursue careers as teachers, entry level chemist, and medicine.

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                                             | Title                                       | Credit Hours |
|--------------------------------------------------|---------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                   |                                             |              |

|                                 |           |
|---------------------------------|-----------|
| Select one PEDS course (p. 615) | 1         |
| Wellness Total                  | 3         |
| <b>Total Credit Hours</b>       | <b>45</b> |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

### Major Requirements

| Code | Title | Credit Hours |
|------|-------|--------------|
|------|-------|--------------|

#### Core Requirements

|                                                 |    |
|-------------------------------------------------|----|
| Complete the core requirements for this program | 45 |
|-------------------------------------------------|----|

#### Area F Courses Related to Major

Students must have a grade of C or better in the courses used to satisfy the major.

|                                        |    |
|----------------------------------------|----|
| Apply one hour from Area A (MATH 1113) | 1  |
| Apply one hour from Area D (MATH 1131) | 1  |
| BIOL 1231K General Biology I           | 4  |
| BIOL 1232K General Biology II          | 4  |
| PHYS 1111 Introductory Physics I       | 3  |
| PHYS 1112 Introductory Physics II      | 3  |
| PHYS 1311 Introductory Physics I Lab   | 1  |
| PHYS 1312 Introductory Physics II Lab  | 1  |
| Area F Total                           | 18 |

#### Area G Program Requirements

Students must have a grade of C or better in the courses used to satisfy the major.

|                                                     |   |
|-----------------------------------------------------|---|
| STAT 1401 Elementary Statistics                     | 3 |
| CHEM 2115 Quantitative Chemical Analysis            | 3 |
| CHEM 2315 Quantitative Chemical Analysis Lab        | 1 |
| CHEM 3111 Organic Chemistry I                       | 3 |
| CHEM 3112 Organic Chemistry II                      | 3 |
| CHEM 3135 Inorganic Chemistry                       | 3 |
| CHEM 3311 Organic Chemistry I Lab                   | 1 |
| CHEM 3312 Organic Chemistry II Lab                  | 1 |
| CHEM 3335 Inorganic Chemistry Lab                   | 1 |
| CHEM 4115 Foundations of Physical Chemistry         | 3 |
| CHEM 4175 Instrumental Methods of Chemical Analysis | 3 |
| CHEM 4315 Foundations of Physical Chemistry Lab     | 1 |

Select the following UTeach Columbus Courses (only two attempts allowed for each of the following courses):

|                                                                                     |                                                                                                                                                          |            |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|------------|

| SPED 4115 | Teaching Math and Science to Exceptional Learners (see note below) | 2 |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

| <b>Credit Hours</b>       |  | <b>12</b>  |
| <b>Total Credit Hours</b> |  | <b>123</b> |

- <sup>1</sup> This course can be taken Fall 1 or Spring 1, depending on when course is offered.
- <sup>2</sup> The Principles of Chemistry sequence are offered each semester and summer. These must be completed by the summer.
- <sup>3</sup> Organic Chemistry 1 and the co-requisite lab are only offered in the fall semester.
- <sup>4</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is required for this degree track. It can be taken either in Area C as a Humanities course or in Area G, as extra credits added to the degree program.
- <sup>5</sup> Organic Chemistry 2 and the co-requisite lab are only offered in the spring semester.
- <sup>6</sup> Enroll in foreign language 1001 if you need a refresher course or want to start a new language.

- <sup>7</sup> Quantitative Chemical Analysis and the co-requisite lab are only offered in the fall semester.
- <sup>8</sup> If ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is not taken in Fall 2 as an Area C Humanities course, then take it in Fall 3 as an Area G requirement.
- <sup>9</sup> Instrumental Analysis and the co-requisite lab are only offered in the spring semester.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To graduate, a student must have 39 credits of upper-division courses (3000 level or higher). These courses may be in any discipline.
- A grade of "C" or higher is required for all chemistry courses.
- The prerequisite for Principles of Chemistry 1 (CHEM 1211 Principles of Chemistry I) and its co-requisite lab is College Algebra (MATH 1111 College Algebra) with a grade of "C" or higher or placement in MATH 1113 Pre-Calculus or higher.
- Introductory Physics 1 and 2 are required for completion of the B.S. in chemistry.
- The prerequisite for Introductory Physics 1 (PHYS 1111 Introductory Physics I) and its lab is pre-calculus (MATH 1113 Pre-Calculus) or higher.
- The prerequisite for Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Biochemistry 1 (CHEM 3141 Biochemistry I) and its co-requisite lab (CHEM 3345 Biochemistry Lab I) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Inorganic Chemistry (CHEM 3135 Inorganic Chemistry) and its co-requisite lab (CHEM 3335 Inorganic Chemistry Lab) are Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) with a "C" or higher.
- The prerequisite for Foundations of Physical Chemistry (CHEM 4115 Foundations of Physical Chemistry) and its co-requisite lab (CHEM 4315 Foundations of Physical Chemistry Lab) are Calculus 1 (MATH 1131 Calculus with Analytic Geometry I) and Introductory Physics 2 (PHYS 1112 Introductory Physics II) and its lab with a "C" or higher.

- Foundations of Physical Chemistry lecture and lab may be offered at night, i.e. 4:30 - 5:45 for the lecture and 6:00 - 8:50 for lab.
- The prerequisite for Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab are Quantitative Chemical Analysis (CHEM 2115 Quantitative Chemical Analysis) and its co-requisite lab (CHEM 2315 Quantitative Chemical Analysis Lab), Organic Chemistry 2 and its co-requisite Lab (CHEM 3312 Organic Chemistry II Lab), and Calculus 1 (MATH 1131 Calculus with Analytic Geometry I). A minimum grade of "C" or higher is required to satisfy the prerequisite requirement.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Quantitative Analysis and its co-requisite lab (CHEM 2115 Quantitative Chemical Analysis and CHEM 2315 Quantitative Chemical Analysis Lab) are only offered in the fall semester.
- Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) is only offered in the spring semester.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Organic Chemistry 1 and its co-requisite lab (CHEM 3111 Organic Chemistry I and CHEM 3311 Organic Chemistry I Lab) are only offered in the fall semester and Organic Chemistry 2 and its co-requisite lab (CHEM 3112 Organic Chemistry II and CHEM 3312 Organic Chemistry II Lab) are only offered in the spring semester.

## Admission Requirements

There are no chemistry program specific admission requirements. During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. Application is made to the COEHP Center for Quality Teaching and Learning. For a list of current admission requirements, go to <https://cctl.columbusstate.edu/teacher-education.php>.

## Additional Program Requirements

Students must receive a grade of "C" or better for all classes in Areas D, F, G, and H. Classes with grades lower than a "C" cannot be used to satisfy prerequisite requirements for courses required in the major.

For teacher certification, students must obtain a minimum overall and CSU grade point average of 2.5.

Prior to the student teaching semester, students must meet all requirements for admission to Student Teaching. For a list of current requirements, go to <https://cctl.columbusstate.edu/student-teaching.php>.

To be recommended for teacher certification, students must pass the GACE Chemistry Test I and Test II (for additional information on the GACE, go to <https://gace.ets.org/>).

## Program Learning Outcomes

- Students will apply both the theoretical and practical principles of the analytical, inorganic, organic and physical divisions of chemistry.

- Students will conduct experiments, analyze data, and interpret results, while using safe and ethical lab practices.
- Students will demonstrate the correct operation of chemical instrumentation.
- Students will demonstrate proficiency in planning instruction based on standards and knowledge of students.
- Students will demonstrate proficiency in using a wide range of instructional strategies and differentiating instruction to help all students learn.
- Students will demonstrate proficiencies related to assessing learning and teaching and using assessment data to adapt instruction for improved student learning.
- Students will display values, commitments, dispositions, and habits associated with effective and professional teaching.

## Chemistry (BS)

### Program Overview

This degree track is designed for students interested in working in a chemical industry or governmental laboratories. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, mathematics, and physics. These electives permit flexibility for evolving and changing student interests. A broad range of upper-level elective courses exists to expose students to modern techniques within the chemical sciences, and to help students expand their college experience.

### Career Opportunities

Students majoring in chemistry may pursue careers as teachers, entry level chemist, and medicine.

### Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

### Core Requirements

| Code                                             | Title                                       | Credit Hours |
|--------------------------------------------------|---------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                   |                                             |              |
| ENGL 1101                                        | English Composition I (minimum grade of C)  | 3            |
| ENGL 1102                                        | English Composition II (minimum grade of C) | 3            |
| MATH 1113                                        | Pre-Calculus                                | 4            |

| Select one PEDS course (p. 615) |           |
| Wellness Total                  | 3         |
| <b>Total Credit Hours</b>       | <b>45</b> |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                                                                | Title                                                 | Credit Hours |

Students must have a grade of C or better in the courses used to satisfy the major.

Select 32 credits from Chemistry Electives (at least 18 credits must be chemistry courses) or UTeach Columbus Teaching Option. Students are strongly encouraged to take CHEM 1715 in their Freshman year.

**Credit Hours** **16**

**Total Credit Hours** **123**

<sup>1</sup> The Principles of Chemistry sequence are offered each semester and summer. These must be completed by the summer.

<sup>2</sup> This course can be taken Fall 1 or Spring 1, depending on when course is offered.

<sup>3</sup> Organic Chemistry 1 and the co-requisite lab are only offered in the fall semester.

<sup>4</sup> Organic Chemistry 2 and the co-requisite lab are only offered in the spring semester.

<sup>5</sup> Quantitative Chemical Analysis and the co-requisite lab is only offered in the fall semester.

<sup>6</sup> Instrumental Analysis and the co-requisite lab is only offered in the spring semester.

<sup>7</sup> Program electives may include additional 3000 level courses in biology, physics, engineering,...etc.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To graduate, a student must have 39 credits of upper-division courses (3000 level or higher). These courses may be in any discipline.
- A grade of "C" or higher is required for all chemistry courses.
- The prerequisite for Principles of Chemistry 1 (CHEM 1211 Principles of Chemistry I) and its co-requisite lab is College Algebra (MATH 1111 College Algebra) with a grade of "C" or higher or placement in MATH 1113 Pre-Calculus or higher.
- Introductory Physics 1 and 2 with the co-requisite labs are required for completion of the B.S. in chemistry.
- The prerequisite for Introductory Physics 1 (PHYS 1111 Introductory Physics I) and its lab is pre-calculus (MATH 1113 Pre-Calculus) or higher with a grade of C or higher.
- The prerequisite for Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Biochemistry 1 (CHEM 3141 Biochemistry I) and its co-requisite lab (CHEM 3345 Biochemistry Lab I) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Inorganic Chemistry (CHEM 3135 Inorganic Chemistry) and its co-requisite lab (CHEM 3335 Inorganic Chemistry Lab) are Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) with a "C" or higher.
- The prerequisite for Foundations of Physical Chemistry (CHEM 4115 Foundations of Physical Chemistry) and its co-requisite lab (CHEM 4315 Foundations of Physical Chemistry Lab) are Calculus 1 (MATH 1131 Calculus with Analytic Geometry I) and Introductory Physics 2 (PHYS 1112 Introductory Physics II) and its lab with a "C" or higher.

- Foundations of Physical Chemistry lecture and lab may be offered at night, i.e. 4:30 - 5:45 for the lecture and 6:00 - 8:50 for lab.
- The prerequisite for Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab are Quantitative Chemical Analysis (CHEM 2115 Quantitative Chemical Analysis) and its co-requisite lab (CHEM 2315 Quantitative Chemical Analysis Lab), Organic Chemistry 2 and its co-requisite Lab (CHEM 3312 Organic Chemistry II Lab), and Calculus 1 (MATH 1131 Calculus with Analytic Geometry I). A minimum grade of "C" or higher is required to satisfy the prerequisite requirement.
- Quantitative Analysis and its co-requisite lab (CHEM 2115 Quantitative Chemical Analysis and CHEM 2315 Quantitative Chemical Analysis Lab) are only offered in the fall semester.
- Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab) are only offered in the spring semester.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Organic Chemistry 1 and its co-requisite lab (CHEM 3111 Organic Chemistry I and CHEM 3311 Organic Chemistry I Lab) are only offered in the fall semester and Organic Chemistry 2 and its co-requisite lab (CHEM 3112 Organic Chemistry II and CHEM 3312 Organic Chemistry II Lab) are only offered in the spring semester.
- Biochemistry 1 and its co-requisite lab (CHEM 3141 Biochemistry I and CHEM 3345 Biochemistry Lab I) are only offered in the fall semester and Biochemistry 2 with its co-requisite lab (CHEM 3142 Biochemistry II and CHEM 3346 Biochemistry II Lab) are only offered in the spring semester.
- Supervised Undergraduate Research (CHEM 4899 Supervised Undergraduate Research) is offered as a 1, 2, or 3 credit hour course. The course may be repeated with a different topic up to 9 credits.
- Additional courses in astronomy, biology, chemistry, computer science, engineering, geology, or mathematics courses may be selected as program electives as approved by advisor and the department chair.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students will apply both the theoretical and practical principles of the analytical, inorganic, organic and physical divisions of chemistry.
- Students will conduct experiments, analyze data, and interpret results, while using safe and ethical lab practices.
- Students will demonstrate the correct operation of chemical instrumentation.

## Chemistry (BS) - ACS Certified Track

### Program Overview

This degree track is designed for students interested in graduate studies in chemistry or related fields. The track is certified by the American

Chemical Society through its Committee on Professional Training. The track provides breadth and depth of experience to give graduates a wide choice of career options, and is especially suited for students desiring to study chemistry in a graduate school. The track also prepares students for entry level positions in industry and government laboratories. In addition to the general degree requirements, the ACS certified track requires satisfactory completion of courses in chemistry, mathematics, and physics. It also enables students to gain substantial research experience through independent study and senior seminar courses under the guidance and mentorship of faculty members. The track provides a sound foundation in the field of chemistry and permits flexibility for evolving and changing student interests. A broad range of upper-level elective courses are offered to expose students to modern techniques within the chemical sciences and to help students expand their college experience.

## Career Opportunities

Students majoring in chemistry may pursue careers as teachers, entry level chemist, and medicine.

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                                             | Title                                                                | Credit Hours |
|--------------------------------------------------|----------------------------------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                   |                                                                      |              |
| ENGL 1101                                        | English Composition I (minimum grade of C)                           | 3            |
| ENGL 1102                                        | English Composition II (minimum grade of C)                          | 3            |
| MATH 1113                                        | Pre-Calculus                                                         | 4            |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

### Area H Program Electives

Students must have a grade of C or better in the courses used to satisfy the major.

Select 20 hours from the following (at least 12 hours must be chemistry courses). Students are strongly encouraged to take CHEM 1715 in their Freshman year.

|           |                                |  |
|-----------|--------------------------------|--|
| CHEM 1715 | Introductory Chemistry Seminar |  |
| CHEM 3142 | Biochemistry II                |  |

|            |                                                   |
|------------|---------------------------------------------------|
| CHEM 3346  | Biochemistry II Lab                               |
| CHEM 3555  | Selected Topics in Chemistry                      |
| CHEM 3698  | Internship                                        |
| CHEM 4185  | Food Chemistry                                    |
| CHEM 5105U | Polymer Chemistry                                 |
| CHEM 5106U | Advanced Biochemistry                             |
| CHEM 5110U | Synthetic Organic Chemistry                       |
| CHEM 5115U | Spectroscopic Identification of Organic Compounds |
| CHEM 5116U | Catalysis                                         |
| CHEM 5555U | Selected Topics in Chemistry                      |
| MATH 3107  | Differential Equations                            |

Additional courses in astronomy, biology, computer science, geology, mathematics, or engineering may be selected as approved by advisor and department chair.

| <b>Total Credit Hours</b> |                                                                                | <b>123</b> |

<sup>1</sup> The Principles of Chemistry sequence are offered each semester and summer. These must be completed by the summer.

<sup>2</sup> This course can be taken Fall 1 or Spring 2, depending on when it is offered.

<sup>3</sup> The pre-require for PHYS 2211 Principles of Physics I and PHYS 2311 Principles of Physics I Lab is MATH 1131 Calculus with Analytic Geometry I with a grade of "C" or better.

<sup>4</sup> Organic Chemistry 1 and the co-requisite lab are only offered in the fall semester.

<sup>5</sup> Organic Chemistry 2 and the co-requisite lab are only offered in the spring semester.

<sup>6</sup> Quantitative Chemical Analysis and the co-requisite lab is only offered in the fall semester.

<sup>7</sup> Instrumental Analysis and the co-requisite lab is only offered in the spring semester.

<sup>8</sup> The pre-require for CHEM 4111 Physical Chemistry I and CHEM 4311 Physical Chemistry I Lab is PHYS 2212 Principles of Physics II and PHYS 2312 Principles of Physics II Lab with a grade of "C" or better.

<sup>9</sup> Program electives may include additional 3000 level courses in biology, physics, engineering,...etc.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To graduate, a student must have 39 credits of upper-division courses (3000 level or higher). These courses may be in any discipline.

- A grade of "C" or higher is required for all chemistry courses.
- The prerequisite for Principles of Chemistry 1 (CHEM 1211 Principles of Chemistry I) and its co-requisite lab is College Algebra (MATH 1111 College Algebra) with a grade of "C" or higher or placement in MATH 1113 Pre-Calculus or higher.
- Principles of Physics 1 and 2 with the co-requisite labs are required for completion of the ACS Certified Track.
- The prerequisite for Principles of Physics 1 (PHYS 2211 Principles of Physics I) and its co-requisite lab (PHYS 2311 Principles of Physics I Lab) is Calculus 1 (MATH 1131 Calculus with Analytic Geometry I) with a grade of C or higher.
- The prerequisite for Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Biochemistry 1 (CHEM 3141 Biochemistry I) and its co-requisite lab (CHEM 3345 Biochemistry Lab I) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Inorganic Chemistry (CHEM 3135 Inorganic Chemistry) and its co-requisite lab (CHEM 3335 Inorganic Chemistry Lab) are Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) with a "C" or higher.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- The prerequisite for Physical Chemistry 1 (CHEM 4111 Physical Chemistry I) and its co-requisite lab (CHEM 4311 Physical Chemistry I Lab) are Physics 2 (PHYS 2212 Principles of Physics II and PHYS 2312 Principles of Physics II Lab).
- Physical Chemistry 1 & 2 lecture and lab may be offered at night, i.e. 4:30 - 5:45 for the lecture and 6:00 - 8:50 for lab.
- Quantitative Analysis and its co-requisite lab (CHEM 2115 Quantitative Chemical Analysis and CHEM 2315 Quantitative Chemical Analysis Lab) are only offered in the fall semester.
- Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab) are only offered in the spring semester.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Organic Chemistry 1 and its co-requisite lab (CHEM 3111 Organic Chemistry I and CHEM 3311 Organic Chemistry I Lab) are only offered in the fall semester and Organic Chemistry 2 and its co-requisite lab (CHEM 3112 Organic Chemistry II and CHEM 3312 Organic Chemistry II Lab) are only offered in the spring semester.
- Biochemistry 1 and its co-requisite lab (CHEM 3141 Biochemistry I and CHEM 3345 Biochemistry Lab I) are only offered in the fall semester and Biochemistry 2 with its co-requisite lab (CHEM 3142 Biochemistry II and CHEM 3346 Biochemistry II Lab) are only offered in the spring semester.
- Senior Seminar 1 & 2 (CHEM 4795 Senior Seminar I & CHEM 4796 Senior Seminar II) are required for completion of the ACS Certified Track. These should be taken sequentially in the senior year.

- Supervised Undergraduate Research (CHEM 4899 Supervised Undergraduate Research) is offered as a 1, 2, or 3 credit hour course. The course may be repeated with a different topic up to 9 credits.
- Additional courses in astronomy, biology, chemistry, computer science, engineering, geology, or mathematics courses may be selected as program electives as approved by advisor and the department chair.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students will apply both the theoretical and practical principles of the analytical, inorganic, organic and physical divisions of chemistry.
- Students will conduct experiments, analyze data, and interpret results, while using safe and ethical lab practices.
- Students will demonstrate the correct operation of chemical instrumentation.
- Students will conduct and present original research.

## Chemistry (BS) - Food Science Track

### Program Overview

This degree track is designed for students interested in working in food industries, food quality assurance work in private industry, government agencies such as the U.S. Department of Agriculture and the Food and Drug Administration or pursuing graduate studies in food science. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, food chemistry, food science, mathematics, and physics. These provide the skills needed to succeed in a variety of food science careers. The Food Science track consists of a broad range of upper-level elective courses to expose students to modern techniques in chemistry and the chemistry of food, and help them expand their college experience. The curriculum emphasizes major chemical and biochemical (enzymatic) reactions that impact food quality with emphasis on food industry applications; the formulation and processing of foods; the role of flavor molecules in food, from both a sensory and food quality perspective; importance of food hygiene, sanitation, and safety during food processing unit operations; and basics of analysis of food and interpret the results.

## Career Opportunities

Students majoring in chemistry may pursue careers as teachers, entry level chemist, and medicine.

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                           | Title                                      | Credit Hours |
|--------------------------------|--------------------------------------------|--------------|
| <b>Area A Essential Skills</b> |                                            |              |
| ENGL 1101                      | English Composition I (minimum grade of C) | 3            |

|                                                         |                                                                      |    |

| <b>Total Credit Hours</b>        |                                                                   | <b>45</b> |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

**Credit Hours 15**

**Total Credit Hours 123**

<sup>1</sup> The Principles of Chemistry sequence are offered each semester and summer. These must be completed by the summer.

<sup>2</sup> Introductory Chemistry Seminar is only offered in the fall semester.

<sup>3</sup> Organic Chemistry 1 and the co-requisite lab are only offered in the fall semester.

<sup>4</sup> Organic Chemistry 2 and the co-requisite lab are only offered in the spring semester.

<sup>5</sup> Quantitative Chemical Analysis and the co-requisite lab are only offered in the fall semester.

<sup>6</sup> Instrumental Analysis and the co-requisite lab are only offered in the spring semester.

<sup>7</sup> Program electives may include additional 3000 level courses in biology, physics, engineering,...etc.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses

can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To graduate, a student must have 39 credits of upper-division courses (3000 level or higher). These courses may be in any discipline.
- A grade of "C" or higher is required for all chemistry courses.
- The prerequisite for Principles of Chemistry I (CHEM 1211 Principles of Chemistry I) and its co-requisite lab is College Algebra (MATH 1111 College Algebra) with a grade of "C" or higher or placement in MATH 1113 Pre-Calculus or higher.
- Introductory Physics 1 and 2 with the co-requisite labs are required for completion of the B.S. in chemistry.
- The prerequisite for Introductory Physics 1 (PHYS 1111 Introductory Physics I) and its lab is pre-calculus (MATH 1113 Pre-Calculus) or higher with a grade of C or higher.
- The prerequisite for Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Biochemistry 1 (CHEM 3141 Biochemistry I) and its co-requisite lab (CHEM 3345 Biochemistry Lab I) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Inorganic Chemistry (CHEM 3135 Inorganic Chemistry) and its co-requisite lab (CHEM 3335 Inorganic Chemistry Lab) are Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) with a "C" or higher.
- The prerequisite for Foundations of Physical Chemistry (CHEM 4115 Foundations of Physical Chemistry) and its co-requisite lab (CHEM 4315 Foundations of Physical Chemistry Lab) are Calculus 1 (MATH 1131 Calculus with Analytic Geometry I) and Introductory Physics 2 (PHYS 1112 Introductory Physics II) and its lab with a "C" or higher.
- Foundations of Physical Chemistry lecture and lab may be offered at night, i.e. 4:30 - 5:45 for the lecture and 6:00 - 8:50 for lab.
- The prerequisite for Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab) are Quantitative Chemical Analysis (CHEM 2115 Quantitative Chemical Analysis) and its co-requisite lab (CHEM 2315 Quantitative Chemical Analysis Lab), Organic Chemistry 2 and its co-requisite Lab (CHEM 3312 Organic Chemistry II Lab), and Calculus 1 (MATH 1131 Calculus with Analytic Geometry I). A minimum grade of "C" or higher is required to satisfy the prerequisite requirement.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.

- Quantitative Analysis and its co-requisite lab (CHEM 2115 Quantitative Chemical Analysis and CHEM 2315 Quantitative Chemical Analysis Lab) are only offered in the fall semester.
- Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab) are only offered in the spring semester.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Organic Chemistry 1 and its co-requisite lab (CHEM 3111 Organic Chemistry I and CHEM 3311 Organic Chemistry I Lab) are only offered in the fall semester and Organic Chemistry 2 and its co-requisite lab (CHEM 3112 Organic Chemistry II and CHEM 3312 Organic Chemistry II Lab) are only offered in the spring semester.
- Biochemistry 1 and its co-requisite lab (CHEM 3141 Biochemistry I and CHEM 3345 Biochemistry Lab I) are only offered in the fall semester and Biochemistry 2 with its co-requisite lab (CHEM 3142 Biochemistry II and CHEM 3346 Biochemistry II Lab) are only offered in the spring semester.
- Supervised Undergraduate Research (CHEM 4899 Supervised Undergraduate Research) is offered as a 1, 2, or 3 credit hour course. The course may be repeated with a different topic up to 9 credits.
- Additional courses in astronomy, biology, chemistry, computer science, engineering, geology, or mathematics courses may be selected as program electives as approved by advisor and the department chair.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students will apply both the theoretical and practical principles of the analytical, inorganic, organic and physical divisions of chemistry.
- Students will conduct experiments, analyze data, and interpret results, while using safe and ethical lab practices.
- Students will demonstrate the correct operation of chemical instrumentation.
- Students will apply chemical principles related to the properties and reactions of food components.

## Chemistry (BS) - Forensic Track

### Program Overview

This B.S. in Forensic Chemistry is designed for students interested in working in a forensics laboratory or pursuing graduate studies in forensics. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, criminal justice, mathematics, and physics. These provide a broad foundation in the field and permit flexibility for evolving and changing student interests. In addition to the core chemistry courses, the Forensic Chemistry track consists of a broad range of upper-level elective courses to expose students to modern techniques in chemistry and chemical forensics and help them expand their college experience. The curriculum emphasizes

evidence collection, analysis, interpretation, and presentation of physical evidence.

## Career Opportunities

Students majoring in chemistry may pursue careers as teachers, entry level chemist, and medicine.

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                                               | Title                                                                | Credit Hours |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

<sup>1</sup> The Principles of Chemistry sequence are offered each semester and summer. These must be completed by the summer.

<sup>2</sup> Introductory Chemistry Seminar is only offered in the fall semester.

<sup>3</sup> Organic Chemistry 1 and the co-requisite lab are only offered in the fall semester.

<sup>4</sup> Organic Chemistry 2 and the co-requisite lab are only offered in the spring semester.

<sup>5</sup> Quantitative Chemical Analysis and the co-requisite lab are only offered in the fall semester.

<sup>6</sup> Instrumental Analysis and the co-requisite lab are only offered in the spring semester.

<sup>7</sup> Program electives may include additional 3000 level courses in biology, physics, engineering,...etc.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- To graduate, a student must have 39 credits of upper-division courses (3000 level or higher). These courses may be in any discipline.
- A grade of "C" or higher is required for all chemistry courses.
- The prerequisite for Principles of Chemistry 1 (CHEM 1211 Principles of Chemistry I) and its co-requisite lab is College Algebra (MATH 1111 College Algebra) with a grade of "C" or higher or placement in MATH 1113 Pre-Calculus or higher.
- Introductory Physics 1 and 2 with the co-requisite labs are required for completion of the B.S. in chemistry.
- The prerequisite for Introductory Physics 1 (PHYS 1111 Introductory Physics I) and its lab is pre-calculus (MATH 1113 Pre-Calculus) or higher.
- The prerequisite for Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Biochemistry 1 (CHEM 3141 Biochemistry I) and its co-requisite lab (CHEM 3345 Biochemistry Lab I) are Organic Chemistry 1 (CHEM 3111 Organic Chemistry I) and its co-requisite lab (CHEM 3311 Organic Chemistry I Lab) with a "C" or higher in each.
- The prerequisite for Inorganic Chemistry (CHEM 3135 Inorganic Chemistry) and its co-requisite lab (CHEM 3335 Inorganic Chemistry Lab) are Organic Chemistry 2 (CHEM 3112 Organic Chemistry II) and its co-requisite lab (CHEM 3312 Organic Chemistry II Lab) with a "C" or higher.
- The prerequisite for Foundations of Physical Chemistry (CHEM 4115 Foundations of Physical Chemistry) and its co-requisite lab (CHEM 4315 Foundations of Physical Chemistry Lab) are Calculus 1 (MATH 1131 Calculus with Analytic Geometry I) and Introductory Physics 2 (PHYS 1112 Introductory Physics II) and its lab with a "C" or higher.

- Foundations of Physical Chemistry lecture and lab may be offered at night, i.e. 4:30 - 5:45 for the lecture and 6:00 - 8:50 for lab.
- The prerequisite for Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab are Quantitative Chemical Analysis (CHEM 2115 Quantitative Chemical Analysis) and its co-requisite lab (CHEM 2315 Quantitative Chemical Analysis Lab), Organic Chemistry 2 and its co-requisite Lab (CHEM 3312 Organic Chemistry II Lab), and Calculus 1 (MATH 1131 Calculus with Analytic Geometry I). A minimum grade of "C" or higher is required to satisfy the prerequisite requirement.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Quantitative Analysis and its co-requisite lab (CHEM 2115 Quantitative Chemical Analysis and CHEM 2315 Quantitative Chemical Analysis Lab) are only offered in the fall semester.
- Instrumental Methods of Chemical Analysis (CHEM 4175 Instrumental Methods of Chemical Analysis) and its co-requisite lab (CHEM 4375 Instrumental Methods of Chemical Analysis Lab) are only offered in the spring semester.
- Inorganic Chemistry and its co-requisite lab (CHEM 3135 Inorganic Chemistry and CHEM 3335 Inorganic Chemistry Lab) may be offered in the fall or spring semester.
- Organic Chemistry 1 and its co-requisite lab (CHEM 3111 Organic Chemistry I and CHEM 3311 Organic Chemistry I Lab) are only offered in the fall semester and Organic Chemistry 2 and its co-requisite lab (CHEM 3112 Organic Chemistry II and CHEM 3312 Organic Chemistry II Lab) are only offered in the spring semester.
- Biochemistry 1 and its co-requisite lab (CHEM 3141 Biochemistry I and CHEM 3345 Biochemistry Lab I) are only offered in the fall semester and Biochemistry 2 with its co-requisite lab (CHEM 3142 Biochemistry II and CHEM 3346 Biochemistry II Lab) are only offered in the spring semester.
- Supervised Undergraduate Research (CHEM 4899 Supervised Undergraduate Research) is offered as a 1, 2, or 3 credit hour course. The course may be repeated with a different topic up to 9 credits.
- Additional courses in astronomy, biology, chemistry, computer science, engineering, geology, or mathematics courses may be selected as program electives as approved by advisor and the department chair.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students will apply both the theoretical and practical principles of the analytical, inorganic, organic and physical divisions of chemistry.
- Students will conduct experiments, analyze data, and interpret results, while using safe and ethical lab practices.
- Students will demonstrate the correct operation of chemical instrumentation.
- Students will apply fundamental theories of Forensic Criminal Justice

# Natural Sciences (MS) - Chemistry

## Program Overview

The Master of Science in the Natural Sciences with a Chemistry Track at Columbus State University is intended to provide students with a curriculum that consists of core and elective courses in chemistry.

Students may enroll in the thesis or non-thesis options. Students admitted into the thesis option are required to conduct research in an area of chemistry of their choice, write a thesis and disseminate the results of their research through publication or other appropriate venue. Students enrolled in the non-thesis option are required to complete additional graduate courses from the electives.

## Career Opportunities

Graduates of the program will be able to pursue a broad range of careers in the field of Natural Sciences. Common areas of employment include public agencies, non-profit organizations, government service, and private business. Students will also be prepared to move into a doctoral level degree program.

## Program of Study Thesis Option

## Admission Requirements

In addition to the Columbus State University Graduate School Admissions requirements, all interested applicants must submit the following materials to be considered for admission for all tracks in the Natural Sciences program:

- Baccalaureate degree from an accredited college or university, demonstrated excellent preparation in the Chemical Sciences.
- Undergraduate grade point average of at least 3.0 on a 4.0 scale. Applicants with an undergraduate GPA less than a 3.00 but equal to or greater than 2.75 may be admitted under provisional conditions.
- A minimum combined score of 290 on the verbal and quantitative portions of the Graduate Record Exam. The GRE's must have been taken in the last five years. [ CSU School code: 5123 ]
- A one page statement of experience and interests.
- Two letters of reference. References should come from persons familiar with the applicant's academic or professional experience.
- Successful competition of at least 20 semester hours of undergraduate chemistry courses (with two semesters of organic chemistry and at least one semester each of analytical, inorganic, and physical chemistry) and excluding General Chemistry I and II lecture and labs.

## Additional Program Requirements

The maximum course load for a graduate student in a given semester is 12 semester hours. The maximum course load for a student holding a graduate assistantship is 10 semester hours.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods within the core discipline of the

Natural Sciences: biology, chemistry, environmental science, and geosciences.

- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of the chosen area of core study.

## Department of Criminal Justice and Sociology

The Department of Criminal Justice and Sociology offers Criminal Justice programs and Sociology programs.

### Criminal Justice

The Department of Criminal Justice & Sociology offers four Criminal Justice programs leading to four outcomes:

- A Bachelor of Science degree in Criminal Justice.
- A Nexus Degree in Public Safety
- An Associate of Applied Science degree in Criminal Justice.
- A one-year undergraduate certificate.

The Bachelor's degree in criminal justice enables students to demonstrate a general knowledge of law enforcement, research, corrections and criminology. Students must take a minimum of 39 credit hours in criminal justice courses in residence at CSU. This degree is also offered fully online.

The Nexus Degree in Public Safety is a 2-year undergraduate transfer degree program designed for the completion of the general education requirements and related studies typically pursued during the first two years of a four-year baccalaureate degree program and including 18 credit hours of public safety and policing curriculum.

The Associate of Applied Sciences Degree in Criminal Justice (AAS CJ) is designed for students who are seeking a degree that will meet the minimum educational requirements of various law enforcement agencies for entry and/or promotion.

The one-year undergraduate certificate requires thirty hours in CRJU courses as approved by the department chair.

Up to 12 hours of credit from professional training academies may be applied toward an associate or bachelor's degree.

The Criminal Justice program also offers advanced professional training and graduate degrees through the Georgia Law Enforcement Command College and the Columbus State Graduate School respectively.

Graduates of CSU's criminal justice programs find secure jobs with local, state and federal government agencies such as city and state police and sheriffs' departments, probation and parole departments, FBI, Georgia Bureaus of Investigation, drug enforcement agencies, the Secret Service, correctional institutions, juvenile justice agencies and in private, industrial security.

For more information, contact the Criminal Justice & Sociology Department at 706-507-8700.

Sociology

The Department of Criminal Justice & Sociology offers a Bachelor of Science in Sociology in three unique tracks that a student can choose from, the

- Sociology (BS)-General Track, which provides students with a plan of study with greatest diversity in elective choices and a level sufficient to pursue graduate studies. The General Track may be completed on-campus or fully online. For online degree visit (<https://academics.columbusstate.edu/degrees-and-programs/bs-sociology.php>)
- Sociology (BS)-Social Services Track, which provides students with coursework that is designed to help them prepare for future employment in the social services arena, and the
- Sociology (BS)-Crime and Deviance Track, which prepares students in various employment areas including criminal justice.

Social forces influence and shape our decisions every day. By pursuing a Bachelor of Science in Sociology at Columbus State University you will unravel the mystery behind human behavior. Create a more equitable world and find a career doing what you love.

Whether you find yourself in health services, social services, management or teaching, a Bachelor of Science in Sociology at Columbus State equips you with the skills and abilities to shape your world. Emphasis is placed on the ability to think rationally and critically about various sociological issues, excelling in interpersonal communication skills, demonstrating a deep understanding of multiculturalism and diversity, and having well-developed skills in research and data analysis. You will have an opportunity to apply the acquired knowledge through Service-Learning in local and global settings. With the flexibility to choose from three tracks you can create a degree plan that fits interests and maximizes your opportunities for employment or graduate school.

Expand your thinking and explore your options. By connecting to different groups, you will raise your awareness of how economic levels, education, ethnicity, or sexual orientation affect perceptions. You will connect with people from all walks of life and have the opportunity to participate in Study Abroad.

Sociology graduates enter the job market with a considerable advantage because the degree hones an array of practical skills for industries that demand creative thinkers and innovators just like you.

For more information, contact the Criminal Justice & Sociology Department at 706-507-8700.

The Department of Criminal Justice and Sociology offer the following degrees:

- Associate of Applied Science in Criminal Justice (AASCJ) (p. 296)
- Criminal Justice (BS) (p. 298)
- Public Safety (Nexus) (<https://catalog.columbusstate.edu/academic-units/letters-sciences/criminal-justice-sociology/nexus-public-safety/>)
- Sociology (BS) - Crime, Deviance, and Society Track (p. 302)
- Sociology (BS) - General Track (p. 306)
- Sociology (BS) - Social Services Track (p. 311)

Associate of Applied Science in Criminal Justice (AASCJ)

Program Overview

The Associate of Applied Science in Criminal Justice (AASCJ) degree is designed for students who are seeking a degree that will meet the minimum educational requirements of various law enforcement agencies for entry and/or promotion. All criminal justice majors are strongly encouraged to take and complete the associate degree in criminal justice before taking any bachelor degree criminal justice courses.

Career Opportunities

- City and-or state police
- Sheriffs' departments
- Probation departments
- Georgia Bureau of Investigation
- Drug enforcement agencies
- Secret Service
- Correctional institutions
- Juvenile justice agencies
- Private, industrial security
- FBI

- <sup>1</sup> B2: Select 2 hours from the following courses:  
ITDS 1779 Scholarship Across the Disciplines (2 cr)  
LEAD 1705 Introduction to Servant Leadership (2 cr)  
PERS 1506 Perspectives (1 cr; may be repeated with a different topic)  
PERS 1507 Perspectives (2 cr)
- <sup>2</sup> Recommend STAT 1401 Elementary Statistics, or MATH 1001 Quantitative Skills and Reasoning or higher.
- <sup>3</sup> SOCI 1168 Social Problems will replace CRJU 2106 Survey of Corrections in Area F.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within two years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and STAT 1401 or MATH 1\*\*\*) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

There are no program specific admission requirements.

## Additional Program Requirements

Up to 12 hours of credit from professional training academies may be applied toward an associate or bachelor's degree.

## Program Learning Outcomes

- principles of criminal justice systems
- knowledge of law enforcement organization and procedures
- skills of legal research and analysis
- concepts of punishment and rehabilitation in the context of correctional systems
- major theories of criminal behavior

# Criminal Justice (BS)

## Program Overview

The Bachelor of Science degree enables students to demonstrate a general knowledge of law enforcement, legal research, corrections and criminology. Students must take a minimum of 39 credit hours in criminal justice courses in residence at Columbus State University.

## Career Opportunities

- City and/or state police
- Sheriffs' departments
- Probation departments
- Georgia Bureau of Investigation
- Drug enforcement agencies
- Secret Service
- Correctional institutions
- Juvenile justice agencies
- Private, industrial security
- FBI

Internship (recommended) <sup>2</sup>

\*In the Program of Study for this major, see Option 1 (General Emphasis) or Option 2 (Public Safety Emphasis), depending on your preference. Your advisor will have you decide which option and courses are a best fit for you.

**Credit Hours 15****Total Credit Hours 123**

<sup>1</sup> B2: Select 1 or 2 hours of ITDS 1779 Scholarship Across the Disciplines, LEAD 1705 Introduction to Servant Leadership, PERS 1506 Perspectives 1-hour or PERS 1507 Perspectives 2-hour.

- <sup>2</sup> It is strongly recommended that students take advantage of the multitude of internships that are offered during their senior year. Internships (if taken in the last semester) can often lead to employment opportunities immediately after graduation.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

B.S. graduates also will be able to demonstrate and apply knowledge about each of the learning outcomes by passing the department exit exam.

## Program Learning Outcomes

- demonstrate knowledge of principles of criminal justice systems
- demonstrate knowledge of knowledge of law enforcement organization and procedures
- demonstrate knowledge of skills of legal research and analysis
- demonstrate knowledge of concepts of punishment and rehabilitation in the context of correctional systems
- demonstrate knowledge of major theories of criminal behavior

## Sociology (BS) - Crime, Deviance, and Society Track

### Program Overview

The Crime and Deviance Track is designed for students who have an interest in criminal justice but see sociology as providing more opportunities for employment than a pure degree in criminal justice. In addition to the standard 12 hours of required core sociology courses (i.e., sociological theory, social research methods, race and ethnic relations, social statistics, stratification and inequality, and sociology capstone), elective credit is divided into 12 hours of directed electives in Area G, which includes options for course work in sociology of deviance, drugs and society, sociology of domestic abuse, race and ethnic relations, and an internship.

Finally, in Area H, students may choose from 15 hours of directed electives that includes courses in juvenile delinquency, violent crime,

violence and society, sociology of aging, sociology of religion and sociology of formal organizations.

The Crime and Deviance Track was designed to make use of the joint Sociology and Criminal Justice Department as suggested by the American Sociological Association. Graduates of this program will be able to demonstrate the ability to think rationally and critically about various sociological issues, excel in interpersonal communication skills, demonstrate a deep understanding of multiculturalism and diversity, understand the nature of crime and deviance, be able to understand criminology and the criminal justice system from an interdisciplinary perspective, and will have well-developed skills in research, data analysis, planning and organizing, and management and demonstrate proficiency with either quantitative and/or qualitative data base and statistical software.

Example study areas include:

The Family

Race, Class, and Gender

Crime, Conformity, and Deviance

Social Stratification, Prejudice and Discrimination

Community Development, and Social Policy

Work and Organizations

Global Studies: - Model African Union

African Women and Development

Social Theory

Social Research Methods

.

## Career Opportunities

- Mental Health Worker
- Adoption Agent
- Corrections Officer
- Child Welfare Officer
- Human Resources
- Welfare Counselor
- Community Service Agency
- Claims Representative
- Public Opinion Surveyor
- Marketing Research Analyst
- Social Worker
- Case Aid Worker
- Child Abuse Case Manager
- Advertising Assistant
- Delinquency Counselor
- Parole/Probation Officer
- Researcher
- Correctional Case Worker
- Technical Writer
- Alcohol/ Drug Case Worker

- Research Assistant
- Consumer Advocate
- Labor Relations
- Personnel Interviewer

<sup>1</sup> Note: Students must complete Area B and Area D with a combined total of 15 credit hours within the following ranges. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1-2 hours;
- Area D1, 7-8 hours;
- Area D2, 3-4 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

SOCI 3156 Sociology of Aging  
SOCI 3157 Sociology of Religion  
SOCI 3158 Sociology of Formal Organizations  
SOCI 3166 Urban Studies
- <sup>3</sup> Except SOCI 1101 Introduction to Sociology and PSYC 1101 Introduction to General Psychology, which are required in Area F.
- <sup>4</sup> Choose from the following Area G course options:  
SOCI 3109 Sociology of Deviance  
SOCI 3117 Race and Ethnic Relations  
SOCI 3128 Drugs and Society  
SOCI 3138 Sociology of Domestic Abuse  
SOCI 4698 Sociology Internship

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- be able to recognize trends and patterns,
- develop the ability to create reports,
- be able to think critically and analytically about issues,
- develop skills in interpersonal communication,
- develop skills in research and data analysis,
- develop skills in planning and organizing, and management.

## Sociology (BS) - General Track

### Program Overview

The General Track is designed to give students maximum ability to make their degree fit their interests and future employment or preparation for graduate school. In addition to the standard 15 hours of required core sociology courses (i.e., sociological theory, social research methods, social statistics, stratification and inequality, and sociology capstone), students choose 27 hours of sociology elective course work. Graduates of this program will be able to demonstrate the ability to think rationally and critically about various sociological issues, excel in interpersonal communication skills, demonstrate a deep understanding of multiculturalism and diversity, and will have well-developed skills in research, data analysis, planning and organizing, and management and demonstrate proficiency with either quantitative or qualitative data base and statistical software.

Example study areas include:

- The Family
- Race, Class, and Gender
- Crime, Conformity, and Deviance
- Social Stratification, Prejudice and Discrimination
- Community Development, and Social Policy
- Work and Organizations
- Global Studies: - Model African Union
- African Women and Development
- Social Theory
- Social Research Methods

### Career Opportunities

- Mental Health Worker
- Adoption Agent
- Corrections Officer
- Child Welfare Officer
- Human Resources
- Welfare Counselor
- Community Service Agency
- Claims Representative
- Public Opinion Surveyor
- Marketing Research Analyst
- Social Worker
- Case Aid Worker
- Child Abuse Case Manager
- Advertising Assistant
- Delinquency Counselor
- Parole/Probation Officer

- Researcher
- Correctional Case Worker
- Technical Writer
- Alcohol/ Drug Case Worker
- Research Assistant
- Consumer Advocate
- Labor Relations
- Personnel Interviewer

<sup>1</sup> Choose from the following B2 courses:  
ITDS 1779 Scholarship Across Disciplines  
LEAD 1705 Introduction to Servant Leadership  
PERS 1506 Perspectives 1-hour  
PERS 1507 Perspectives 2-hours

<sup>2</sup> Except SOCI 1101 Introduction to Sociology and PSYC 1101 Introduction to General Psychology, which are required in Area F.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- be able to recognize trends and patterns,
- develop then ability to create reports,
- be able to think critically and analytically about issues,
- develop skills in interpersonal communications,
- develop skills in research and data analysis,
- develop skills in planning and organizing, and management.

## Sociology (BS) - Social Services Track

### Program Overview

The Social Services Track is designed for students who intend to work in areas of social service and non-profit organizations. First students

are expected to complete a strong foundation of required courses of 15 hours of course work, sociological theory, social research methods, social statistics, stratification and inequality, and sociology capstone. Then, they are required to choose 12 hours of directed electives in Area G, which includes options for social work practice, clinical sociology, race and ethnic relations, advanced qualitative research methods, and an internship. Finally, in Area H, students are required to choose 12 hours of directed elective credit from courses like social welfare policy, social work ethics, drugs, domestic abuse, family, and several other courses.

Graduates of this program will be able to demonstrate the ability to think rationally and critically about various sociological issues, excel in interpersonal communication skills, demonstrate a deep understanding of multiculturalism and diversity, and will have well-developed skills in research, data analysis, planning and organizing, management and demonstrate proficiency with either quantitative or qualitative data base and statistical software, and hands-on experience if they choose an internship.

Example study areas include:

The Family

Race, Class, and Gender

Crime, Conformity, and Deviance

Social Stratification, Prejudice and Discrimination

Community Development, and Social Policy

Work and Organizations

Global Studies: - Model African Union

African Women and Development

Social Theory

Social Research Methods

## Career Opportunities

- Mental Health Worker
- Adoption Agent
- Corrections Officer
- Child Welfare Officer
- Human Resources
- Welfare Counselor
- Community Service Agency
- Claims Representative
- Public Opinion Surveyor
- Marketing Research Analyst
- Social Worker
- Case Aid Worker
- Child Abuse Case Manager
- Advertising Assistant
- Delinquency Counselor
- Parole/Probation Officer
- Researcher
- Correctional Case Worker
- Technical Writer
- Alcohol/ Drug Case Worker

- Research Assistant
- Consumer Advocate
- Labor Relations
- Personnel Interviewer

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and STAT 1401 or MATH 1\*\*\*) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- be able to recognize trends and patterns,
- develop then ability to create reports,
- be able to think critically and analytically about issues,
- develop skills in interpersonal communications,
- develop skills in research and data analysis,
- develop skills in planning and organizing, and management.

## Department of Earth and Space Sciences

The Department of Earth and Space Sciences offers programs that are designed to take advantage of the range of physical science disciplines within the department, emphasizing the links between various fields. These degree programs incorporate a broad base of related scientific disciplines, including BS degree programs in astrophysics and planetary geology, environmental science, geology, robotics engineering, and science education (with our UTeach Columbus program). We also offer in the Master of Natural Science program MS degree tracks in Environmental Science and Geoscience, plus an MS degree in Robotics Engineering, and an accelerated BS/MS degree in robotics engineering. Further, we offer a certificate program in robotics and an Associate degree in engineering, as well as minors in astronomy, geology, physics, and UTeach. Our faculty offer the most diverse array of courses, degrees and student research opportunities at Columbus State University. Students have many opportunities to be involved in research, either in the lab or in the field, as well as presenting their work at regional and national conferences. If you've ever been interested in the world around you, ESS has a class or a degree for you.

The Department of Earth and Space Sciences offers the following degrees:

- Associate of Science (AS) (p. 316)
- Associate of Science in Engineering Studies (AS) (p. 318)
- Earth and Space Science (BS) - Astrophysics and Planetary Geology Track (p. 322)
- Earth and Space Science (BS) - Environmental Science Track (p. 325)
- Earth and Space Science (BS) - Geology Track (p. 328)
- Earth and Space Science (BS) - Secondary Education Track (p. 331)
- Earth and Space Science (BS) / Natural Sciences (MS) - Environmental Science Track (Combined Option) (p. 337)
- Natural Sciences (MS) - Environmental Science Track (Non-Thesis Option) (p. 341)
- Natural Sciences (MS) - Environmental Science Track (Thesis Option) (p. 342)
- Natural Sciences (MS) - Geosciences Track (p. 343)
- Robotics Engineering (BS) (p. 344)
- Robotics Engineering (BS) / Robotics Engineering (MS) (Combined Option) (p. 347)
- Robotics Engineering (MS) (p. 349)

# Associate of Science (AS)

## Program Overview

The Associate of Science (AS) degrees is a 2-year undergraduate transfer degree program designed largely for the completion of the general education requirements and related lower division studies typically pursued during the first two years of a four-year baccalaureate degree program. Most of the coursework in this transfer AS degree programs encompasses CSU's Core Curriculum requirements, which include some preparatory or introductory coursework for particular upper division majors. However, these transfer associate degrees do not include in-depth studies in a particular major, as in-depth studies in a major field are typically pursued at the upper division level (last two years) of a four-year degree program.

## Career Opportunities

The Associate of Science (AS) degrees is a 2-year undergraduate transfer degree program designed largely for the completion of the general education requirements and related lower division studies typically pursued during the first two years of a four-year baccalaureate degree program.

<sup>1</sup> Select any course approved for Areas B-F and not previously used to fulfill core requirements.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within two years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and STAT 1401 or MATH 1\*\*\*) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students demonstrate competency in written communication by writing effectively in a variety of situations and for a variety of audiences.
- Students demonstrate competency in reading by interpreting the meaning of key terms; recognizing the primary purpose of a passage; making appropriate inferences; and recognizing rhetorical devices.
- Students demonstrate competency in quantitative reasoning by solving real-world problems that involve numerical data.
- Students demonstrate competency in critical thinking by interpreting and evaluating evidence in a piece of writing and drawing valid conclusions based on the information presented.

# Associate of Science in Engineering Studies (AS)

## Program Overview

The Associate of Science in Engineering Studies (AS) degrees is a 2-year undergraduate transfer degree program designed largely for the completion of the general education requirements and related lower division studies typically pursued during the first two years of a four-year baccalaureate degree program. Most of the coursework in this transfer AS degree programs encompasses CSU's Core Curriculum requirements, which include some preparatory or introductory coursework for particular upper division majors. However, these transfer associate degrees do not include in-depth studies in a particular major, as in-depth studies in a major field are typically pursued at the upper division level (last two years) of a four-year degree program.

## Career Opportunities

The Associate of Science (AS) degrees is a 2-year undergraduate transfer degree program designed largely for the completion of the general education requirements and related lower division studies typically pursued during the first two years of a four-year baccalaureate degree program.

| Select one PEDS course at the 1000 level |                                                    | 1         |
| Wellness Total                           |                                                    | 3         |
| <b>Total Credit Hours</b>                |                                                    | <b>45</b> |

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                            | Title                                          | Credit Hours |

**Credit Hours** **18**

**Total Credit Hours** **71**

<sup>1</sup> MATH 1111 is a prerequisite for MATH 1113 Pre-Calculus. Some students enrolled in MATH 1111 might also need to enroll, concurrently, with College Algebra support classes MATH 0999A, MATH 0999B, or MATH 0999C, depending on the amount of support needed. Given the math starting point, 8 more credits (over the usual 63) are required for this degree: MATH 1111 (3 credits), MATH support class (1 credit), and MATH 1113 (4 credits).

<sup>2</sup> Prerequisite for MATH 1131 Calculus with Analytic Geometry I.

<sup>3</sup> Highly recommended out of list of Behavioral Science courses.

<sup>1</sup> Or other classes listed in Area F.

<sup>2</sup> Highly recommended out of list of Behavioral Science courses.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within two years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and STAT 1401 or MATH 1\*\*\*) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

If you plan to transfer to Georgia Tech or REPP Institutes, here is a summary of transfer requirements beyond the AS degree requirements:

- MATH: MATH 2115 Introduction to Linear Algebra, MATH 2135 Calculus with Analytic Geometry 3, MATH 3107 Differential Equations (must be finished at CSU) before transferring. These courses are not part of the AS degree.
- PHYS 2212 Principles of Physics II/PHYS 2312 Principles of Physics II Lab (Area F option) must be taken if not taken for AS.

- CHEM 1211 Principles of Chemistry I and CHEM 1212 Principles of Chemistry II with labs (Area D options) must be taken if not taken for AS.
- ENGR courses: ENGR 2115 Statics, ENGR 2125 Dynamics of Rigid Bodies, ENGR 2165 Thermodynamics must be taken at CSU prior to transferring.

Students who plan to major in Electrical Engineering or Mechanical Engineering may take #, ENGR 2117 Circuits and Electronics, , ENGR 2206 Digital Logic , ENGR 2217 Robotics Engineering Design, ENGR 3235 Circuit Analytics , and ENGR 3236 Introduction to Signal Processing at CSU.

**See your advisor about admission criteria** to the REPP Institutes or refer to the the E&SS website under Engineering Studies. Your GPA scores in Math & Sciences will affect how easy or hard it will be to be accepted into the Georgia Tech program. In addition, Extra Curriculum activities you have done at CSU may help to transfer to Tech. Please also refer to the Sample Schedules for different Engineering Majors under the E&SS Web Site in Engineering Studies Section.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

# Program Learning Outcomes

## Earth and Space Science (BS) - Astrophysics and Planetary Geology Track

## Program Overview

Astrophysics is the study of planets, stars, galaxies and the universe itself. Planetary Geology is the study of planets beyond Earth, and to an extent the study of Earth as a planet.

## Career Opportunities

Majoring in a physical science, such as our Astrophysics and Planetary Geology degree, sets you up for a wealth of possible careers because you will become an excellent problem solver. Working for or with NASA as they move into the 2010s and beyond is only one of the many possibilities. People with similar degrees also work as writers, doctors, lawyers, and engineers.

- Physics degree holders are in the top 2 scoring groups of majors on the MCAT (2003 statistics)
- NASA expects not to have enough people to replace those who will be retiring in the next 20 years. NASA funds missions to study the Earth as well as astronomical objects.
- News outlets need science journalists, and movies often employ scientists as consultants.
- Staff for Members of Congress and patent lawyers need technical and scientific backgrounds.

Becoming an Astrophysics and Planetary Geology major will open up a world (or even a universe!) of possibilities for you after you leave Columbus.

<sup>1</sup> Extra hour applied to Area F.

<sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

<sup>1</sup> MATH 1113 Pre-Calculus can be replaced by MATH 1131 Calculus with Analytic Geometry I if placement tests allow.

<sup>2</sup> BIOL 1215K Principles of Biology can be replaced by ENVS 1105 Environmental Studies, ENVS 1205K Sustainability and the Environment, or GEOL 1110 Natural Disasters: Our Hazardous Environment.

<sup>3</sup> MATH 1132 Calculus with Analytic Geometry II can be replaced by other area H if already taken.

<sup>4</sup> GEOL 3266 Mineralogy is taught every 3 semesters. If not taken in this semester, it will not be offered again until Spring 2022.

<sup>5</sup> This Area G PHYS course is currently planned but specific course rotations may be adjusted to fit student needs.

<sup>6</sup> May take additional Area H Program Electives if needed.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- Area H Program Electives must total to 26 hours, which is 22 hours plus MATH 1132 Calculus with Analytic Geometry II, or 26 hours if MATH 1132 Calculus with Analytic Geometry II is applied to Area D.

## Admission Requirements

Students are presumed to enter the program with the equivalent of MATH 1111 College Algebra. Students without that background may need to take additional classes to meet course prerequisites.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- demonstrate a working knowledge of the major conceptual areas of astronomy and astrophysics.
- demonstrate competence in the technical aspects of astronomical and planetary research, including collection and analysis of data, use of telescopes, and ability to interpret astronomical and geological data.
- demonstrate critical thinking skills and the ability to communicate scientific information and appropriate interpretations of geological and/or astronomical data through written or verbal presentation.

## Earth and Space Science (BS) - Environmental Science Track

### Program Overview

The baccalaureate degree program in environmental science is intended to provide a strong and diverse background to prepare graduates for successful careers in the rapidly growing industry of environmental management and protection. To that end, the program's curriculum courses not only in Environmental Science but also in Biology, Chemistry, Ecology, Geology and cultural studies. The environmental science program's singular diversity of course offerings and flexible curriculum encourage each student to design a unique program suited to his or her individual goals. Student by student, we emphasize the building of a firm foundation in the underpinning concepts of environmental science, proficiency in designing and conducting original research, and effectiveness in communicating the results in both written and oral forms.

### Career Opportunities

Students graduating with degrees in Environmental Sciences find gainful employment in private industry and the public sector. Graduates serve as environmental professionals in local, state, and federal environmental resource agencies; in the private sector as environmental consultants.

<sup>1</sup> Extra hour applied to Area F.

<sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

- <sup>1</sup> BIOL 1215K Principles of Biology is a prerequisite for some upper level ENVS and BIOL courses.
- <sup>2</sup> The following courses are BIOL 3217K Ecology prerequisites for students in the Environmental Science track of the BS Earth and Space Sciences degree: BIOL 1215K Principles of Biology, CHEM 1211 Principles of Chemistry I, CHEM 1211L Principles of Chemistry I Lab, CHEM 1212 Principles of Chemistry II, CHEM 1212L Principles of Chemistry II Lab, and ENVS 3105 Foundations of Environmental Science.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- 1-4 hours from Area B may be used in Area H.
- ENVS 5405U Topics in Conservation is taught on a rotating basis. It is critical for you to meet with your advisor each semester in order to design a schedule that incorporates these classes during the semesters they are offered
- Area H courses are listed as 3 or 4 hours, although some Area H classes may be 5+ credit hours. Regardless of which courses are

taken for Area H credit, all students must complete 24 total hours of Area H program electives. Additionally, all students must complete a minimum of 39 upper level (3000+ level) credit hours in order to graduate.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

Students must earn a "C" or better in all Area F and G courses.

## Program Learning Outcomes

- demonstrate a working knowledge of key concepts, principles, theories, and methods in Environmental Science.
- employ critical and analytical thinking in application of the scientific method, including formulating questions, analyzing data, interpreting results, and drawing conclusions.
- effectively communicate scientific information in both oral and written format.

## Earth and Space Science (BS) - Geology Track

### Program Overview

Geology encompasses the study of minerals, rocks, ancient life and Earth history, earthquakes, volcanoes, flooding, coastal erosion, tsunamis, mountain belts, economic resources, landslides, environmental pollution and water resources. Geologists are, in fact, among the primary workers engaged in studying and protecting the Earth's environment

Students in the B.S. Earth and Space Sciences-Geology track take fundamental coursework in the fields of mineralogy and petrology, sedimentology and stratigraphy, structural geology and tectonics, hydrology and geochemistry, geomorphology, paleontology, paleoclimate and environmental geology. Most courses include a laboratory, and many include a field component. In preparation for upper level geology coursework, students take one year of chemistry and physics courses, as well as calculus. Interested students may have the opportunity to participate in undergraduate research with geology faculty.

### Career Opportunities

From mineral and energy exploration, to monitoring of volcanoes and landslides, to environmental protection and regulation; geologists are employed in a wide variety of fields across the globe. Many geologists work in the fields of energy and mineral exploration, where salaries are the most lucrative. Other geologists work to protect society from volcanoes, earthquakes, landslides, and floods. Some geologists study Earth history in order to understand changes in life, climate and other Earth systems through time. A significant number of geologists work to protect society from environmental degradation, including soil and water pollution, and are employed in both the private and public sector. Many of these geologists are employed as environmental scientists, which along with geoscientists are consistently ranked among the fastest growing occupations in the U.S. economy by the Bureau of Labor Statistics.

<sup>1</sup> Extra hour applied to Area F.

<sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

<sup>1</sup> GEOL 1122 Introductory Geo-sciences II: Historical Geology/GEOL 1322 Introductory Geo-sciences II: Historical Geology Lab is a prerequisite for GEOL 3235 Sedimentary Geology, GEOL 4275 Structural Geology, and some Area H electives for students in the Geology track.

<sup>2</sup> GEOL 3266 Mineralogy is offered every 3 semesters and is a prerequisite for GEOL 3215 Igneous and Metamorphic Geology.

<sup>3</sup> GEOL 3235 Sedimentary Geology may only be offered every other year due to a shortage in staffing.

<sup>4</sup> GEOL 3215 Igneous and Metamorphic Geology is offered every 3 semesters.

<sup>5</sup> GEOL 4275 Structural Geology is offered every 3 semesters.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- 1-4 hours from Area B may be used in Area H.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- identify and describe fundamental earth materials (e.g. rocks and minerals), explain the internal and surficial processes by which they form, and utilize this knowledge to solve basic geologic problems.
- describe the major fossil groups present in the geologic record, how these organisms relate to events in geological time, and will be able to utilize this information to interpret ancient environments and the evolution of life on our planet.
- describe internal Earth processes (i.e. Plate Tectonics) that produce deformation of rock and large scale tectonic features on our planet, and will be able to utilize this information to solve problems in structural geology.
- describe the interactions between Earth processes and Human societies, including using Earth's geological resources (e.g. water, fossil fuels) and managing Earth's natural and man-made hazards, and will be able to use this information to solve problems related to the Human environment.
- gather and synthesize a variety of geologic data to create stratigraphic columns, geologic maps and cross-sections, interpret the geologic history of a region, develop strategies for mitigating risk to human societies associated with the interaction of human and geologic processes, and communicate (i.e. written, oral) geologic concepts in an effective manner.

## Earth and Space Science (BS) - Secondary Education Track

### Program Overview

UTeach Columbus is an innovative program that prepares students for an exciting career in mathematics or science. Upon completion of the program, students will earn a degree in earth and space science, and be qualified to teach in a middle school or high school after passing the

appropriate state certification examinations. Students completing this program are highly qualified for jobs utilizing their science knowledge, or for either informal education jobs or for work in a K-12 school setting. UTeach Columbus also provides close mentoring by Master Teachers, as well as having a dedicated advisor.

More information about UTeach Columbus can be obtained by calling 706-507-8612 or by visiting our website at <http://uteach.columbusstate.edu/index.php> (<http://uteach.columbusstate.edu/>).

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

## Career Opportunities

- middle or high school science teacher
- education outreach at science museums, national parks
- work with geology or environmental science consulting firms

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                                             | Title                                                                | Credit Hours |
|--------------------------------------------------|----------------------------------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                   |                                                                      |              |

- <sup>1</sup> Extra hour applied to Area F.
- <sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.
- Area B1, 3 hours;
  - Area B2, 1 hour;
  - Area D1, 8 hours;
  - Area D2, 3 hours.
- <sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

**Credit Hours** **12**

**Total Credit Hours** **123**

<sup>1</sup> (Fall 2020) Notes: ASTR 1105 Descriptive Astronomy: The Solar System, & ENVS 1105 Environmental Studies are pre-requisites for several Area G and Area H electives.

<sup>2</sup> (Fall 2021) Notes: GEOL 2225 The Fossil Record, GEOL 5255U Environmental Geology & ENGR 2206 Digital Logic will be taught this semester and can be used as an Area G elective.

<sup>3</sup> (Spring 2022) Notes: GEOL 5165U Hydrology & GEOL 4235 Geographic Information and Global Positioning Systems will be taught this semester, and can be used as an Area G elective.

<sup>4</sup> (Spring 2022) Notes: ENGR 2217 Robotics Engineering Design, ENVS 5226U Culture and Environment, & GEOL 3266 Mineralogy will be taught this semester and can be used as an Area H elective. GEOL 1122 Introductory Geo-sciences II: Historical Geology is a prerequisite for several Area G and Area H electives.

<sup>5</sup> (Fall 2022) Notes: GEOL 2225 The Fossil Record, GEOL 5255U Environmental Geology, ENGR 2206 Digital Logic, ENVS 3105 Foundations of Environmental Science, ENVS 4206 Water Resources Management & ASTR 3105 Physics, Chemistry, and Geology of the Solar System will be taught this semester and can be used as an Area G elective.

<sup>6</sup> (Fall 2022) Notes: GEOL 3235 Sedimentary Geology & GEOL 3215 Igneous and Metamorphic Geology will be taught this semester and can be used as an Area H elective.

<sup>7</sup> (Spring 2023) Notes: GEOL 3265 Stratigraphy and Basin Analysis, ENGR 2217 Robotics Engineering Design, GEOL 4275 Structural Geology, ENVS 5226U Culture and Environment & GEOL 5275U Vertebrate Paleontology will be taught this semester and can be used in Area H.

<sup>8</sup> (Spring 2023) Notes: GEOL 5165U Hydrology & GEOL 4235 Geographic Information and Global Positioning Systems will be taught this semester and can be used as an Area G elective.

<sup>9</sup> (Fall 2023) Notes: GEOL 2225 The Fossil Record, GEOL 5255U Environmental Geology, ENGR 2206 Digital Logic & ENVS 3105 Foundations of Environmental Science will be taught this semester and can be used as an Area G elective.

<sup>10</sup> (Fall 2023) Notes: GEOL 3235 Sedimentary Geology & ENVS 4206 Water Resources Management will be taught this semester and can be used in Area H.

!!!! Please note: Many of these courses are only offered once a year, rather than every semester, and many of them have prerequisites. While you can rearrange the order in which you take your courses, you should consult with your advisor to ensure that you will be able to take the courses in a timely manner so that you do not delay your graduation.

## Program Map with with Calculus

| Course                    | Title                                                                                            | Credit Hours |

| SPED 4115                 | Teaching Math and Science to Exceptional Learners (minimum grade of C; see note below) | 2         |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

**Credit Hours** **12**

**Total Credit Hours** **123**

- <sup>1</sup> (Fall 2020) Notes: ASTR 1105 Descriptive Astronomy: The Solar System, & ENVS 1105 Environmental Studies are pre-requisites for several Area G and Area H electives.
  - <sup>2</sup> (Fall 2021) Notes: GEOL 2225 The Fossil Record, GEOL 5255U Environmental Geology & ENGR 2206 Digital Logic will be taught this semester and can be used as an Area G elective.
  - <sup>3</sup> (Spring 2022) Notes: GEOL 5165U Hydrology & GEOL 4235 Geographic Information and Global Positioning Systems will be taught this semester, and can be used as an Area G elective.
  - <sup>4</sup> (Spring 2022) Notes: ENGR 2217 Robotics Engineering Design, ENVS 5226U Culture and Environment, & GEOL 3266 Mineralogy will be taught this semester and can be used as an Area H elective. GEOL 1122 Introductory Geo-sciences II: Historical Geology is a prerequisite for several Area G and Area H electives.
  - <sup>5</sup> (Fall 2022) Notes: GEOL 2225 The Fossil Record, GEOL 5255U Environmental Geology, ENGR 2206 Digital Logic, ENVS 3105 Foundations of Environmental Science, ENVS 4206 Water Resources Management & ASTR 3105 Physics, Chemistry, and Geology of the Solar System will be taught this semester and can be used as an Area G elective.
  - <sup>6</sup> (Fall 2022) Notes: GEOL 3235 Sedimentary Geology & GEOL 3215 Igneous and Metamorphic Geology will be taught this semester and can be used as an Area H elective.
  - <sup>7</sup> (Spring 2023) Notes: GEOL 3265 Stratigraphy and Basin Analysis, ENGR 2217 Robotics Engineering Design, GEOL 4275 Structural Geology, ENVS 5226U Culture and Environment & GEOL 5275U Vertebrate Paleontology will be taught this semester and can be used in Area H.
  - <sup>8</sup> (Spring 2023) Notes: GEOL 5165U Hydrology & GEOL 4235 Geographic Information and Global Positioning Systems will be taught this semester and can be used as an Area G elective.
  - <sup>9</sup> (Fall 2023) Notes: GEOL 2225 The Fossil Record, GEOL 5255U Environmental Geology, ENGR 2206 Digital Logic & ENVS 3105 Foundations of Environmental Science will be taught this semester and can be used as an Area G elective.
  - <sup>10</sup> (Fall 2023) Notes: GEOL 3235 Sedimentary Geology & ENVS 4206 Water Resources Management will be taught this semester and can be used in Area H.
- !!!! Please note: Many of these courses are only offered once a year, rather than every semester, and many of them have prerequisites. While you can rearrange the order in which you take your courses, you should consult with your advisor to ensure that you will be able to take the courses in a timely manner so that you do not delay your graduation.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

Students must meet all requirements for admission to Teacher Education. For a list of current requirements, go to <https://cctl.columbusstate.edu/teacher-education.php>

## Additional Program Requirements

Students must complete all courses related to their major with a C or better unless otherwise approved.

For teacher certification, students must obtain a minimum overall and CSU grade point average of 2.5.

Students must meet all requirements for admission to Teacher Education. For a list of current requirements, go to <https://cctl.columbusstate.edu/teacher-education.php>

Students must meet all requirements for admission to Student Teaching. For a list of current requirements, go to <https://cctl.columbusstate.edu/student-teaching.php>

To be recommended for teacher certification, students must pass the GACE Science Test I and Test II (<https://gace.ets.org/>).

## Program Learning Outcomes

- Students will demonstrate expertise in content by passing the GACE content test in Earth/Space Science.
- Students will demonstrate proficiency in planning instruction based on standards and knowledge of students.
- Students will demonstrate proficiency in using a wide range of instructional strategies and differentiating instruction to help all students learn.
- Students will demonstrate proficiencies related to assessing learning and teaching and using assessment data to adapt instruction for improved student learning.
- Students will display values, commitments, dispositions, and habits associated with effective and professional teaching
- Students will be able to design and conduct meaningful experimental measurements in a lab or field setting.
- Students will be able to synthesize data and new research results with prior knowledge.

- Students will recognize that scientific knowledge is tentative, and will be modified in the face of new and valid evidence.

## Earth and Space Science (BS) / Natural Sciences (MS) - Environmental Science Track (Combined Option)

### Program Overview

Environmental Science has emerged as one of the fastest growing career fields and its importance becomes ever more apparent with the rapid environmental changes occurring world-wide in the twenty-first century. It is an interdisciplinary science that relies on knowledge and techniques synthesized from the disciplines of Geology, Biology, Engineering, Chemistry, and Physics. Environmental scientists seek to solve complex human caused environmental problems associated with air and water pollution, natural habitat loss and degradation, and global change and as such their research has the potential to influence the future sustainability of our planet. As these issues grow in importance, the demand for these inter-disciplinary scientists, trained to understand and solve complex environmental problems and their consequences, will only continue to grow. The Environmental Science program at Columbus State University is structured to train scientists to address the existing challenges and those yet realized in the future. Columbus State University's Environmental Sciences program is the only one in Georgia that offers this breadth of background. The program is designed to educate a new generation of interdisciplinary Environmental Scientists who will have the knowledge and experiences need to solve the increasingly complex and multi-faceted environmental issues.

| <b>Total Credit Hours</b>       |                     | <b>45</b> |

- <sup>1</sup> Extra hour applied to Area F.
- <sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.
- Area B1, 3 hours;
  - Area B2, 1 hour;
  - Area D1, 8 hours;
  - Area D2, 3 hours.

- <sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

- <sup>1</sup> Up to 3 can be added from Areas A, B and/or D with advisor approval.
- <sup>2</sup> Courses taken for undergraduate credit may not be taken for graduate credit.

## BS and MS Requirements

### Major Requirements

| Code                                                                 | Title                                           | Credit Hours |
|----------------------------------------------------------------------|-------------------------------------------------|--------------|

**Area H Program Electives Required Hours** **24****Area H1 Undergraduate Required Hours** **15**

Any 3000+ BIOL, CHEM, ENVS, or GEOL course.

With advisor approval, any 3000+ ANTH or GEOG course

**Area H2: combined Requirements:** **9**

Any Group B course from Area 2 of the graduate program, or with advisor approval, any 5000G+ ANTH, BIOL, CHEM, ENVS, GEOG, or GEOL course.

**Area 1 Graduate Program Core Required Hours** **3**

ENGL 5149G Grant Writing

**Area 2 Program Electives Required Hours:** **21-22**

Group A: Take the following course

ENVS 5207G Experimental Design and Statistical Analysis

ENVS 5715G Earth and Space Sciences Seminar

ENVS 6106

Group B: Take one of the following. Courses taken for undergraduate credit may not be taken for graduate credit

ANTH 5125G Human Ecology

ENVS 5165G Hydrology

ENVS 5226G Culture and Environment

ENVS 5315G Stream Ecology

ENVS 5405G Topics in Conservation

ENVS 6235 Geographic Information and Global Positioning Systems

ENVS 7115 Environmental Chemistry

GEOL 5135G Oceanography

GEOL 5215G Geomorphology

\*Add 9 hours from Area H2

**Area 3: Program Requirements:** **11-12**

Thesis Required Hours:

ENVS 7000 Thesis Defense

ENVS 7999 Research in Environmental Science

| PEDS Activity                |                                                                 | 1   |

**Credit Hours** **14-15**

#### Summer

|           |                                   |   |
|-----------|-----------------------------------|---|
| ENVS 7999 | Research in Environmental Science | 5 |
| Area 2B   | Elective (Grad)                   | 3 |

**Credit Hours** **8**

### Fifth Year

#### Fall

|            |                                              |   |
|------------|----------------------------------------------|---|
| ENGL 5149G | Grant Writing                                | 3 |
| ENVS 5207G | Experimental Design and Statistical Analysis | 4 |
| ENVS 7999  | Research in Environmental Science            | 3 |

**Credit Hours** **10**

#### Spring

|            |                                                       |   |
|------------|-------------------------------------------------------|---|
| ENVS 7000  | Thesis Defense                                        | 0 |
| ENVS 7001  | Certification Exam                                    | 0 |
| ENVS 7999  | Research in Environmental Science                     | 4 |
| ENVS 5715G | Earth and Space Sciences Seminar (Grad)               | 1 |
| ENVS 6235  | Geographic Information and Global Positioning Systems | 4 |

**Credit Hours** **9**

**Total Credit Hours** **148-152**

- 1 Substitute MATH 1131 Calculus with Analytic Geometry I for MATH 1113 Pre-Calculus if math placement allows.
- 2 BIOL 1215K Principles of Biology is a prerequisite for BIOL 3217K Ecology.
- 3 STAT 1401 Elementary Statistics is a coreq for ENVS 3105 Foundations of Environmental Science (Area G).
- 4 ANTH 1105 Cultural Anthropology is a prereq for Culture and the Environment (Area G).
- 5 BIOL 3217K Ecology prereq ESS: BIOL 1215K Principles of Biology, CHEM 1211 Principles of Chemistry I, CHEM 1211L Principles of Chemistry I Lab, CHEM 1212 Principles of Chemistry II, CHEM 1212L Principles of Chemistry II Lab, and ENVS 3105 Foundations of Environmental Science.

## Additional Notes

All graduate level courses must be B or better ( $\geq B$ ) to count toward the graduate portion of the degree.

Application Requires:

1. Complete application for admission into this joint BS+MS program.
2. Attain junior standing (62+ credits).
3. Complete both:
  - a. All courses in Area F, and
  - b. At least 15 credits of Area G courses.
4. Achieve minimum institutional GPA of 3.0 overall and 3.5 calculated on all Area G
5. Submit research proposal
6. Submit a proposed plan of study (by semester)
7. Submit a recommendation letter from a prospective graduate thesis advisor
8. Score 1000+ on the GRE (New GRE combined 290)
9. Apply for MS NS Environmental Science Track

This program map illustrates appropriate coursework for completing a degree within five years, provided that course grades allow for earned credit. Since not all courses are taught every semester, please consult with your advisor to determine when courses can be taken in a different semester or sequence than illustrated. This map is for illustrative

purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change.

## Admission Requirements

### Additional Program Requirements

### Program Learning Outcomes (BS)

- demonstrate a working knowledge of key concepts, principles, theories, and methods in Environmental Science.
- employ critical and analytical thinking in application of the scientific method, including formulating questions, analyzing data, interpreting results, and drawing conclusions.
- effectively communicate scientific information in both oral and written format.

### Program Learning Outcomes (MS)

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods within the core discipline of the Natural Sciences: biology, chemistry, environmental science, and geosciences.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of the chosen area of core study.

## Natural Sciences (MS) - Environmental Science Track (Non-Thesis Option)

### Program Overview

Master of Natural Science - Environmental Science track offers a unique master's degree that is a comprehensive and broadly-based course of study. We offer state of the art science courses in toxicology, ecology, anthropology, environmental chemistry, environmental geology, paleontology, geomorphology, hydrology, and geography. Because many aspects of our environmental problems are inherently societal issues, we also have courses in Environmental Law and Regulation; Culture and the Environment; Human Ecology; Land-Use and Waste Management; and Water Resources Management. With such a diversity of course offerings and flexible curriculum, each student can design a unique program suited to his or her individual goals.

### Career Opportunities

Graduates are well prepared for careers as government or private sector scientists or policy makers. Many students are gainfully employed as environmental consultants. A select group of graduates has continued to pursue higher level education in Doctoral programs at some of the United States' premier Universities.

### Program of Study

| Code                       | Title         | Credit Hours |
|----------------------------|---------------|--------------|
| <b>Area 1 Program Core</b> |               |              |
| ENGL 5149G                 | Grant Writing | 3            |

|              |   |
|--------------|---|
| Area 1 Total | 3 |
|--------------|---|

#### Area 2 Program Concentration

Select the following 3 courses unless taken for undergraduate credit:

|            |                                                           |   |
|------------|-----------------------------------------------------------|---|
| ENVS 5207G | Experimental Design and Statistical Analysis              | 4 |
| ENVS 5715G | Earth and Space Sciences Seminar (taken twice for credit) | 2 |
| ENVS 6235  | Geographic Information and Global Positioning Systems     | 4 |

Select two courses from Group A and two from Group B; at least one of these courses must include a lab (13-16 hours)

|            |                            |  |
|------------|----------------------------|--|
| Group A:   |                            |  |
| ATSC 5117G | Climate and Global Change  |  |
| ENVS 5165G | Hydrology                  |  |
| ENVS 5255G | Environmental Geology      |  |
| ENVS 7115  | Environmental Chemistry    |  |
| GEOL 5135G | Oceanography               |  |
| GEOL 5215G | Geomorphology              |  |
| Group B:   |                            |  |
| ENVS 5226G | Culture and Environment    |  |
| ENVS 5315G | Stream Ecology             |  |
| ENVS 5405G | Topics in Conservation     |  |
| ENVS 6206  | Water Resources Management |  |
| ENVS 5109G | Environmental Air Quality  |  |

Program Electives - Select 4-7 credits from any 5000+ graduate ATSC, BIOL, CHEM, ENVS, GEOL, GEOG with advisor approval (4-7 hours) <sup>1</sup> 4-7

|              |    |
|--------------|----|
| Area 2 Total | 30 |
|--------------|----|

#### Area 3 Program Requirements

|              |                    |   |
|--------------|--------------------|---|
| ENVS 6698    | Internship         | 3 |
| ENVS 7001    | Certification Exam | 0 |
| Area 3 Total |                    | 3 |

|                           |           |
|---------------------------|-----------|
| <b>Total Credit Hours</b> | <b>36</b> |
|---------------------------|-----------|

<sup>1</sup> May take Environmental Science Seminar for up to 2 additional credits beyond the 2 required semesters. May take Internship (ENVS 6698 Internship) for up to 3 additional credits beyond the 3 required.

## Admission Requirements

In addition to the Columbus State University Graduate School Admissions requirements, all interested applicants must submit the following materials to be considered for admission for all tracks in the Natural Sciences program.

- Baccalaureate degree from an accredited college or university, demonstrated excellent preparation in the Biological, Chemical, Environmental and/or Geological Sciences or permission of the program director.
- Undergraduate grade point average of at least 3.0 on a 4.0 scale.
- A minimum combined score of 290 on the verbal and quantitative portions of the Graduate Record Exam. The GRE must have been taken in the last five years.
- A one page statement of experience and interests.
- Two letters of reference. References should come from persons familiar with the applicant's academic or professional experience.

## Additional Program Requirements

The maximum course load for a graduate student in a given semester is 12 semester hours. The maximum course load for a student holding a graduate assistantship is 10 semester hours.

Present a scientific seminar evaluating the accomplishments and results of their internship.

Comprehensive written exams covering learning objectives must be satisfactorily completed before graduation.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods within the core discipline of the Natural Sciences: biology, chemistry, environmental science, and geosciences.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of the chosen area of core study.

## Natural Sciences (MS) - Environmental Science Track (Thesis Option)

### Program Overview

Master of Natural Science - Environmental Science track offers a unique master's degree that is a comprehensive and broadly-based course of study. We offer state-of-the-art science courses in toxicology, ecology, anthropology, environmental chemistry, environmental geology, paleontology, geomorphology, hydrology, and geography. Because many aspects of our environmental problems are inherently societal issues, we also have courses in Environmental Law and Regulation; Culture and the Environment; Human Ecology; Land-Use and Waste Management; and Water Resources Management. With such a diversity of course offerings and flexible curriculum, each student can design a unique program suited to his or her individual goals.

### Career Opportunities

Graduates are well prepared for careers as government or private sector scientists or policy makers. Many students are gainfully employed as environmental consultants. A select group of graduates has continued to pursue higher level education in Doctoral programs at some of the United States' premier Universities.

## Additional Program Requirements

The maximum course load for a graduate student in a given semester is 12 semester hours. The maximum course load for a student holding a graduate assistantship is 10 semester hours.

Complete original, scientific research and write a comprehensive Master's thesis based on this research.

Give an oral presentation of their Master's thesis to a committee of approved reviewers in a forum open to the public.

Successfully defend their Master's thesis during a comprehensive oral examination.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods within the core discipline of the Natural Sciences: biology, chemistry, environmental science, and geosciences.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of the chosen area of core study.

## Natural Sciences (MS) - Geosciences Track

### Program Overview

The M.S. in Natural Sciences program develops a broad based scientific background in one of four tracks: Biology, Chemistry, Environmental Science, Geosciences. The program also develops the research skills necessary to design and conduct original research.

The opportunity to take graduate courses in a specific track or combine graduate courses from each of the tracks allows the student to design a graduate course of study to suit his or her own specific interests and goals. The two-year curriculum allows students to focus on required courses and complete research in a timely manner. Graduate assistantship employment opportunities provide tuition and competitive stipends.

The Natural Sciences Program has...

Broadly trained faculty with diverse areas of expertise with Southeastern, National and International research programs.

Well-equipped, modern laboratories as well as access to protected natural areas.

A wide variety of study abroad courses that allow students to conduct research projects abroad.

The Department of Earth and Space Sciences offers a Master's degree in Natural Sciences with a focus on the Geosciences (MNSgeo). Students accepted to the MNSgeo program complete 36 hours of coursework culminating in a written thesis, with 12 of the 36 course hours devoted to thesis research. Students in the MNSgeo program work with ESS faculty to develop a thesis research project as a requirement for graduation. ESS faculty are involved in a wide variety of research areas encompassing paleontology and paleoenvironments, sedimentology and stratigraphy, structural geology and tectonics, and interactions between the physical and human worlds.

## Career Opportunities

Graduates of the program will be able to pursue a broad range of careers in the field of Natural Sciences. Common areas of employment include public agencies, non-profit organizations, government service, and private business. Students will also be prepared to move into a doctoral level degree program.

<sup>1</sup> Equivalent courses taken at the undergraduate level may not be repeated for credit.

<sup>2</sup> Students must pass GEOL 6000 Comprehensive Exam, which should be taken after completion of at least 18 hours of graduate level coursework.

## Admission Requirements

In addition to the Columbus State University Graduate School Admissions requirements, all interested applicants must submit the following materials to be considered for admission for all tracks in the Natural Sciences program.

- Baccalaureate degree from an accredited college or university, demonstrated excellent preparation in the Biological, Chemical, Environmental and/or Geological Sciences or permission of the program director.
- Undergraduate grade point average of at least 3.0 on a 4.0 scale.
- A minimum combined score of 290 on the verbal and quantitative portions of the Graduate Record Exam. The GRE must have been taken in the last five years.
- A one page statement of experience and interests.
- Two letters of reference. References should come from persons familiar with the applicant's academic or professional experience.

## Additional Program Requirements

The maximum course load for a graduate student in a given semester is 12 semester hours. The maximum course load for a student holding a graduate assistantship is 10 semester hours. Students in the Geosciences track must complete a thesis as part of their degree requirements.

## Program Learning Outcomes

- Demonstrate knowledge and understanding of key concepts, principles, theories, and methods within the core discipline of the Natural Sciences: biology, chemistry, environmental science, and geosciences.
- Employ critical and analytical thinking in application of the scientific method, including formulating and testing hypotheses, designing experiments, analyzing data, interpreting results, and drawing conclusions.
- Report orally and in writing research results and conclusions according to accepted standards of the chosen area of core study.

# Robotics Engineering (BS)

## Program Overview

Robotics Engineering degree is a four-year course of study leading to exciting careers and/or advanced studies in robotics and automation. The robotics engineering faculty are dedicated to undergraduate and graduate teaching and to working closely with students at all levels of their study. The program equips students with the practical skills of an engineer combined with the fundamental knowledge and understanding gained through the study of physics. The program allows for a focus on the hardware, modeling and programming all of which are the integral components of robotics.

The application of robotics is a "multi-craft" activity in that it is the blending of multiple disciplines including computer engineering, mechanical engineering, and electrical engineering. A roboticist engages in the design, construction, and programming of robotic systems, including wheeled mobile robots, drones (unmanned aerial systems), autonomous marine vehicles, space systems, and industrial robot manipulators.

## Career Opportunities

Students graduating with a Bachelor's degree in Robotics Engineering typically work in the robotics and automation industry or continue their studies in graduate school, or enter the armed services.

<sup>1</sup> Extra hour applied to Area F.

<sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                            | Title | Credit Hours |
|-------------------------------------------------|-------|--------------|
| <b>Core Requirements</b>                        |       |              |
| Complete the core requirements for this program |       | 45           |
| Core Total                                      |       | 45           |

<sup>1</sup> Students are recommended to take ECON 2105 Macroeconomics or ECON 2106 Microeconomics as their Area E Behavioral Science course.

## Additional Notes

- Courses in Areas B, C, E, and Wellness are interchangeable and can be taken at any time, with a recommendation of only taking one per semester to spread them out.
- This course map assures placement in MATH 1131 Calculus I first fall semester. If the student is not able to take it first semester, then many courses are pushed back one year (Physics, Statics, and anything that has those as prerequisites). Students are highly encouraged to take a math placement test as soon as possible before their first semester.
- Students are recommended to take ECON 2105 or ECON 2106 as their Area E Behavioral Science course.

- Students are encouraged to take ENGR 4698 Undergraduate Internship in the summer between years 3 and 4.
- This program map illustrates appropriate coursework for completing a degree within four years, provided the course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester. This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Those who have already taken the Foundational courses (15 credit hours) mentioned in the catalog for BS in Robotics Engineering need only one year to finish the MA in Robotics Engineering (4 + 1) program mentioned.

## Admission Requirements

Please see the general undergraduate admission requirements. There are no additional admission requirements for the Bachelor of Science in Robotic.

## Additional Program Requirements

Please see the undergraduate academic regulations section of the catalog. There are no additional academic regulations for the Bachelor of Science in Robotics Engineering.

## Program Learning Outcomes

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Communicate effectively with a range of audiences
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

## Robotics Engineering (BS) / Robotics Engineering (MS) (Combined Option)

### Program Overview

#### BS Overview

Robotics Engineering degree is a four-year course of study leading to exciting careers and/or advanced studies in robotics and automation. The robotics engineering faculty are dedicated to undergraduate and graduate teaching and to working closely with students at all levels of their study. The program equips students with the practical skills of an engineer combined with the fundamental knowledge and understanding gained through the study of physics. The program allows for a focus on

the hardware, modeling and programming all of which are the integral components of robotics.

The application of robotics is a "multi-craft" activity in that it is the blending of multiple disciplines including computer engineering, mechanical engineering, and electrical engineering. A roboticist engages in the design, construction, and programming of robotic systems, including wheeled mobile robots, drones (unmanned aerial systems), autonomous marine vehicles, space systems, and industrial robot manipulators.

#### Career Opportunities

Students graduating with a Bachelor's degree in Robotics Engineering typically work in the robotics and automation industry or continue their studies in graduate school, or enter the armed services.

#### MS Overview

Master of Science degree in Robotics Engineering offers a comprehensive course of study in robotics. Research opportunities exist for students to actively participate in the program's research activities. The research areas include image processing, computer vision, artificial intelligence, industrial robot manipulators, unmanned aerial vehicles, autonomous ground robots, embedded systems, and microelectronics.

#### Career Opportunities

Robotics Engineering graduates typically work in the robotics industry, continue their studies in doctoral programs at premier institutions.

| <b>Total Credit Hours</b> | <b>45</b> |

- <sup>1</sup> Extra hour applied to Area F.
- <sup>2</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

- <sup>3</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

## Program Map

5 Year Program Map

## Admission Requirements

### Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

### BS Learning Outcomes

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Communicate effectively with a range of audiences
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

### MS Learning Outcomes

- Formulate and solve advanced robotics engineering problems
- Demonstrate the ability to creatively design, plan, and conduct complex robotics engineering projects
- Effectively communicate the results of a comprehensive research project or internship through oral presentations and/or publications

## Robotics Engineering (MS)

### Program Overview

Master of Science degree in Robotics Engineering offers a comprehensive course of study in robotics. Research opportunities exist for students to actively participate in the program's research activities. The research areas include image processing, computer vision, artificial intelligence, industrial robot manipulators, unmanned aerial vehicles, autonomous ground robots, embedded systems, and microelectronics.

### Career Opportunities

Robotics Engineering graduates typically work in the robotics industry, continue their studies in doctoral programs at premier institutions.

Program of Study

| Code                                                                                                                                                                     | Title                              | Credit Hours |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|--------------|
| Area 1 Program Core                                                                                                                                                      |                                    |              |
| Take one of the following courses twice for a total of 6 hours                                                                                                           |                                    | 6            |
| ENGR 6399                                                                                                                                                                | Graduate Research Project          |              |
| ENGR 6689                                                                                                                                                                | Supervised Graduate Internship     |              |
| Take the following foundational courses                                                                                                                                  |                                    |              |
| ENGR 5151G                                                                                                                                                               | Computer Vision 1                  | 3            |

Admission Requirements  
Additional Program Requirements

There are no program specific academic regulations.

Program Learning Outcomes

- Formulate and solve advanced robotics engineering problems
- Demonstrate the ability to creatively design, plan, and conduct complex robotics engineering projects

- Effectively communicate the results of a comprehensive research project or internship through oral presentations and/or publications

Department of English

The Department of English provides graduates with the essential foundations of critical thinking, reading, and writing skills. In addition to pursuing traditional careers in the discipline—like teaching, publishing, library science, journalism, and creative writing—our graduates succeed in business, law, and public policy. Our majors also pursue graduate degrees in English, creative writing, rhetoric, and technical communication. While at CSU, English majors are encouraged to study abroad and to engage in undergraduate research projects. English majors have presented conference papers at local, regional, and national conferences and published work in peer-reviewed journals. Our award-winning student literary journal, Arden, and the D. L. Jordan Endowment for Creative Writing also provide students opportunities to gain editing and publishing experience as undergraduates.

The Department of English offers the following degrees:

- English (BA) - Creative Writing Concentration (p. 350)
- English (BA) - Literature Concentration (p. 354)
- English (BA) - Professional Writing Concentration (p. 358)
- English (BA) - Secondary Education Concentration (p. 362)

English (BA) - Creative Writing Concentration

Program Overview

The Department of English provides graduates with the essential foundations of critical thinking, reading, and writing skills. English majors often engage in undergraduate research projects, presenting conference papers at local, regional, and national conferences and publishing work in peer-reviewed journals. Our award-winning student literary journal, Arden, provides students an opportunity to gain editing and publishing experience as undergraduates. In addition to numerous study abroad courses, English majors have the opportunity to participate in the New York Arts program.

With the BA in English-Creative Writing track, students explore various kinds of creative writing (poetry, fiction, nonfiction, screenwriting, playwriting) and then develop their talents to a higher level with advanced courses: advanced poetry writing, advanced fiction writing, and advanced creative nonfiction writing.

Career Opportunities

In addition to pursuing traditional careers in the discipline—like teaching, library science, journalism, and creative writing—our graduates succeed in business, law, and medicine. Our majors also pursue graduate degrees in English, creative writing, rhetoric, and technical communication.

<sup>1</sup> Note: Students must complete Area B and Area D with a combined total of 15 credit hours within the following ranges. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1-2 hours;
- Area D1, 7-8 hours;
- Area D2, 3-4 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                               | Title                                              | Credit Hours |
|----------------------------------------------------|----------------------------------------------------|--------------|
| <b>Core Requirements</b>                           |                                                    |              |
| Complete the core requirements for this program    |                                                    | 45           |
| Core Total                                         |                                                    | 45           |
| <b>Area F Courses Related to Major</b>             |                                                    |              |
| Minimum grade of C is required in each ENGL course |                                                    |              |
| ENGL 2155                                          | Introduction to Literary Studies: Critical Methods | 3            |
| ENGL 2156                                          | Introduction to Literary Studies II: Poetics       | 3            |
| ENGL 2157                                          | Writing for the English Major                      | 3            |
| Foreign Language 1002                              |                                                    | 3            |
| Foreign Language 2001                              |                                                    | 3            |
| Select one of the following:                       |                                                    | 3            |

|                                     |                                                    |    |

<sup>1</sup> ENGL 2111 World Literature I, ENGL 2112 World Literature II, ENGL 2135 Multicultural Literature, ENGL 2136 Language and Culture, ENGL 2147 Introduction to Film, ENGL 3129 International Drama, ENGL 3130 Film Genres and Themes, ENGL 4505 Selected Topics in Shakespeare, or ENGL 4507 Selected Topics in African American Literature.

<sup>2</sup> In their senior year, Creative Writing majors must take either ENGL 5744U Studies in the Novel (an Area G course requiring a minimum grade of C) in the fall and an Area I general elective in the spring or ENGL 5545U Advanced Topics in Literature, Writing, and Theory (an Area G course requiring a minimum grade of C) in the spring and an Area I general elective in the fall.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or

MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.

- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no specific academic regulations.

## Program Learning Outcomes

- Students demonstrate competency in written communication by writing effectively in a variety of situations and for a variety of audiences.
- Students demonstrate competency in reading by interpreting the meaning of key terms; recognizing the primary purpose of a passage; making appropriate inferences; and recognizing rhetorical devices.
- Students demonstrate competency in quantitative reasoning by solving real-world problems in contexts that involve numerical data.
- Students demonstrate competency in critical thinking by interpreting and evaluating evidence in a piece of writing and drawing valid conclusions based on the information presented.

## English (BA) - Literature Concentration

### Program Overview

The Department of English provides graduates with the essential foundations of critical thinking, reading, and writing skills. English majors often engage in undergraduate research projects, presenting conference papers at local, regional, and national conferences and publishing work in peer-reviewed journals. Our award-winning student literary journal, Arden, provides students an opportunity to gain editing and publishing experience as undergraduates. In addition to numerous study abroad courses, English majors have the opportunity to participate in the New York Arts program.

Students in the BA in English-Literature track study British and American writers, and may also pursue their interests in literary criticism, linguistics, world literature, ethnic literature, and film. This track provides groundwork for students planning to attend graduate or professional school in the humanities, education, law, or any field that requires the critical thinking skills developed by students of literature.

### Career Opportunities

In addition to pursuing traditional careers in the discipline—like teaching, library science, journalism, and creative writing—our graduates succeed in business, law, and medicine. Our majors also pursue graduate degrees in English, creative writing, rhetoric, and technical communication.

Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A " (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

Admission Requirements

There are no program specific admission requirements.

Additional Program Requirements

There are no specific academic regulations.

Program Learning Outcomes

- Write clearly and effectively, and adjust writing style appropriately to the content, the context, and the nature of the subject.
- Identify and analyze rhetorical and theoretical concepts in the work of other writers, and integrate these concepts effectively into their own writing.
- Develop and complete research projects, and find, evaluate, synthesize, and integrate information effectively.
- Demonstrate an understanding of key periods, genres, and theoretical approaches in literary and/or cultural productions.

English (BA) - Professional Writing Concentration

Program Overview

The Department of English provides graduates with the essential foundations of critical thinking, reading, and writing skills. English majors often engage in undergraduate research projects, presenting conference papers at local, regional, and national conferences and publishing work in peer-reviewed journals. Our award-winning student literary journal, Arden, provides students an opportunity to gain editing and publishing experience as undergraduates. In addition to numerous study abroad courses, English majors have the opportunity to participate in the New York Arts program.

The BA in English-Professional Writing track prepares students for writing careers in business or industry. The track offers courses in technical writing, news writing, business writing, and writing for digital media. Internships with Columbus-area organizations provide students with valuable hands-on experience. Professional writing students develop strong skills in electronic research, writing, layout, web design, and editing.

Career Opportunities

In addition to pursuing traditional careers in the discipline—like teaching, library science, journalism, and creative writing—our graduates succeed in business, law, and medicine. Our majors also pursue graduate degrees in English, creative writing, rhetoric, and technical communication.

Program of Study

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no specific academic regulations.

## Program Learning Outcomes

- Students demonstrate competency in written communication by writing effectively in a variety of situations and for a variety of audiences.

- Students demonstrate competency in reading by interpreting the meaning of key terms; recognizing the primary purpose of a passage; making appropriate inferences; and recognizing rhetorical devices.
- Students demonstrate competency in quantitative reasoning by solving real-world problems in contexts that involve numerical data.
- Students demonstrate competency in critical thinking by interpreting and evaluating evidence in a piece of writing and drawing valid conclusions based on the information presented.

# English (BA) - Secondary Education Concentration

## Program Overview

The Department of English provides graduates with the essential foundations of critical thinking, reading, and writing skills. English majors often engage in undergraduate research projects, presenting conference papers at local, regional, and national conferences and publishing work in peer-reviewed journals. Our award-winning student literary journal, Arden, provides students an opportunity to gain editing and publishing experience as undergraduates. In addition to numerous study abroad courses, English majors have the opportunity to participate in the New York Arts program.

The BA in English and Secondary Education prepares students for teacher certification and a career in teaching. Complementing this track, the department offers courses to satisfy Georgia requirements for an endorsement (to teacher certification) for English as a Second or Other Language (ESOL).

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

## Career Opportunities

In addition to pursuing traditional careers in the discipline—like teaching, library science, journalism, and creative writing—our graduates succeed in business, law, and medicine. Our majors also pursue graduate degrees in English, creative writing, rhetoric, and technical communication.

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                           | Title                                       | Credit Hours |
|--------------------------------|---------------------------------------------|--------------|
| <b>Area A Essential Skills</b> |                                             |              |
| ENGL 1101                      | English Composition I (minimum grade of C)  | 3            |
| ENGL 1102                      | English Composition II (minimum grade of C) | 3            |
| Select one of the following:   |                                             | 3            |

| There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course. |                                                                                                           |           |

**Credit Hours 12**

**Total Credit Hours 124**

<sup>1</sup> Requires admission to the Teacher Education program.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. Application is made to the COEHP Center for Quality Teaching and Learning. For a list of current admission requirements, go to <https://cqt.columbusstate.edu/teacher-education.php>.

## Additional Program Requirements

Students must complete all courses related to major with a C or better unless otherwise approved.

Students must meet all requirements for admission to Teacher Education. For a list of current requirements, go to <https://cqtl.columbusstate.edu/teacher-education.php>.

Students must meet all requirements for admission to Student Teaching. For a list of current requirements, go to <https://cqtl.columbusstate.edu/student-teaching.php>.

To be recommended for teacher certification, students must pass the GACE English Test I and Test II (for additional information on the GACE, go to <https://gace.ets.org/>).

## Program Learning Outcomes

- Students demonstrate competency in written communication by writing effectively in a variety of situations and for a variety of audiences.
- Students demonstrate competency in reading by interpreting the meaning of key terms; recognizing the primary purpose of a passage; making appropriate inferences; and recognizing rhetorical devices.
- Students demonstrate competency in quantitative reasoning by solving real-world problems in contexts that involve numerical data.
- Students demonstrate competency in critical thinking by interpreting and evaluating evidence in a piece of writing and drawing valid conclusions based on the information presented.

## Department of History and Geography

Located on the RiverPark campus in uptown Columbus, Georgia, the department houses faculty with expertise in European, Islamic, Latin American, African American, Medieval, Military, Native American, and United States history. Courses in Urban Geography, Cultural Geography, Community Geography, and Geographic Information Systems enhance the research and employment opportunities of our graduates. Class size is small, and faculty members advise all majors and remain actively involved in their academic progress. The department organizes trips to local and regional historical sites, leads study abroad programs, and makes available to all students numerous internships and other learning opportunities.

The Department of History and Geography offers the following degrees:

- History (BA) (p. 366)
- History (BA) - Secondary Education Track (p. 370)

## History (BA)

### Program Overview

Located on the RiverPark campus in uptown Columbus, Georgia, the department houses faculty with expertise in Latin American, African American, Medieval, Military and International, Native American, Islamic and United States history. Courses in Urban Geography, Cultural Geography and Geographic Information Systems enhance the research and employment opportunities of our graduates. Class size is small, and faculty members advise all majors and remain actively involved in their academic progress. The department organizes trips to local and regional

historical sites, and makes available to all students numerous internships and other learning opportunities.

Only a handful of history majors become historians. Some grow to be history teachers, many others move on to a different career. Indeed, people trained in liberal arts, and in history in particular, are well equipped to succeed in a variety of fields, from business to law, from archive and library sciences to politics, from administration to art. And yet, a degree in history promises much more than a fulfilling job.

History students understand the complexity of the human experience. They are exposed to its diversity as they learn about peoples and societies around the world, and as they think about how these changed over time. They see how various individuals and groups interacted in different settings, and reflect on the reasons why people acted the way they did, and on the consequences of their choices. They respect these differences, while working to understand their origin and evolution.

## Career Opportunities

A degree in history offers a **wide variety of job and career opportunities** ranging from teaching to business, from journalism to law school, from working in libraries/archives to museums.

Indeed, a degree in history offers a **wide range of skills** that can be applied very broadly.

### Historians as Educators

- Elementary Schools
- Secondary Schools
- Postsecondary Education
- Historic Sites and Museums

### Historians as Researchers

- Museums and Historical Organizations
- Cultural Resources Management and Historic Preservation
- Think Tanks

### Historians as Communicators

- Writers and Editors
- Journalists
- Documentary Editors
- Producers of Multimedia Material

### Historians as Information Managers

- Archivists
- Records Managers
- Librarians
- Information Managers

### Historians as Advocates

- Lawyers and Paralegals
- Litigation Support
- Legislative Staff Work
- Foundations

## Historians in Businesses and Associations

- Historians in Corporations
- Contract Historians
- Historians and Nonprofit Associations

**Credit Hours 15****Total Credit Hours 123**<sup>1</sup> Depends on the specific Minor.<sup>2</sup> GEOG 1101 World Regional Geography, GEOG 2215 Introduction to the Geographic Information Systems, etc.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- Area H Program Electives Required Hours: 24.
- "C" or better required in HIST and GEOG courses used in this area. Select 6 to 9 hours of HIST or GEOG courses 3000-level or above.
- History majors must choose a Minor. If a Minor requires 15 hours, the student must take 9 hours of Area H program electives. If a Minor

requires 18 hours, the students must take 6 hours of Area H program electives.

Admission Requirements

There are no program specific admission requirements.

Additional Program Requirements

Students seeking the B.A. in History must earn grades of C or better in all HIST and GEOG courses in Areas G and H.

Program Learning Outcomes

- Explain the causes and consequences of major historical events and processes and situate these events and ideas within a broader historical and thematic context.
- Compare and contrast historical developments across time, space, and cultures.
- Analyze a variety of types of primary sources drawing on appropriate historical context.
- Critically evaluate (compare and contrast and explain the evolution of) different scholarly interpretations of historical evidence.
- Utilize resources including library catalogs, archives, and electronic databases to assemble primary and secondary sources relevant to a historical question.
- Frame answerable historical research questions and construct persuasive and clearly written historical arguments drawing on primary and secondary source evidence, using appropriate professional documentation methods.

History (BA) - Secondary Education Track

Program Overview

The B.A. program in History and Secondary Education at Columbus State University provides basic and advanced content and pedagogical studies that develop expertise in the teaching of diverse secondary social studies students. Students explore important historical themes and concepts, analyze and model effective instructional strategies, and practice the skills they learn in a variety of secondary school settings.

All educator preparation programs are approved by the Georgia Professional Standards Commission.

Career Opportunities

The B.A. program in History and Secondary Education leads to entry level certification and qualifies students to teach in grades six through twelve (6-12).

| SPED 2256    | Introduction to the Exceptional Learner in General Education (minimum grade of C; see note below) | 3 |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

**Credit Hours** 17

**Credit Hours** 12

**Total Credit Hours** 131

<sup>1</sup> If starting a new language or needing a review, choose the foreign language option.

<sup>2</sup> Requires admission to Teacher Education.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

Admission into the Teacher Education Program. During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. Admission to Teacher Education is completed through TK20. For further information please go to <https://cctl.columbusstate.edu/teacher-education.php>. (<https://cctl.columbusstate.edu/teacher-education.php>)

Admission to the Teacher Education Program is based on the following:

- Completion of EDUC 2130 Exploring Learning and Teaching (or approved equivalent) with a grade of "C" or better

- Completion of 45 earned semester hours in the core with an overall GPA of 2.50 or better on all transcripts and a CSU GPA of 2.50 or better
- Completion of nine earned semester hours at Columbus State University with a minimum institutional GPA of 2.5 (required of all transfer students)
- Satisfactory performance on the GACE Program Admission test or an exemption based upon satisfactory scores on the SAT (1000 combined score), ACT (43 combined score), or GRE (1030 combined score)
- Good academic standing during the semester in which admission is requested
- Completion of FBI background check with fingerprints indicating no criminal record or discharge from the armed services that could prevent recommendation for teacher certification
- Completion of the Program Entry level (350) of the Georgia Professional Standards Commission's Georgia Educator Ethics Assessment
- Health and PE majors only: Certificate of successful completion of the Health Fitness Test
- Have not been withdrawn, removed from or denied admission to a teacher education program or student teaching at CSU or another institution.
- Failure to disclose information and/or submission of false information may result in immediate dismissal from the College of Education and Health Professions Teacher Education Program.

Additional admissions criteria may be applied at the departmental level. Admission decisions are appealable to the College of Education and Health Professions Undergraduate Council.

## Additional Program Requirements

To be eligible for CSU's recommendation for a Georgia professional teaching certificate, students must complete a rigorous program of coursework. They also must meet certain other criteria required by the Georgia Professional Standards Commission. Please contact the COEHP Student Advising & Field Experiences office at 706-568-2191 or 706-568-2194 for further information.

## Program Learning Outcomes

- Explain the causes and consequences of major historical events and processes and situate these events and ideas within a broader historical and thematic context.
- Compare and contrast historical developments across time, space, and cultures.
- Analyze a variety of types of primary sources drawing on appropriate historical context.
- Critically evaluate (compare and contrast and explain the evolution of) different scholarly interpretations of historical evidence.
- Utilize resources including library catalogs, archives, and electronic databases to assemble primary and secondary sources relevant to a historical question.
- Frame answerable historical research questions and construct persuasive and clearly written historical arguments drawing on primary and secondary source evidence, using appropriate professional documentation methods.
- Demonstrate proficiency in planning instruction based on standards and knowledge of students.

- Demonstrate proficiency in using a wide range of instructional strategies and differentiating instruction to help all students learn.
- Demonstrate proficiencies related to assessing learning and teaching and using assessment data to adapt instruction for improved student learning.
- Display values, commitments, dispositions, and habits associated with effective and professional teaching

## Department of Mathematics

The Department of Mathematics has always embraced a broad view of its mission, which includes leadership in the classical fields of Algebra, Analysis, Applied Mathematics, Geometry, and Probability, as well as cutting-edge interdisciplinary research involving the other Sciences. We emphasize the art of teaching as well as the cultivation of the next generation of Mathematics teachers, and we engage in outreach to our local and state communities.

The Department of Mathematics prides itself on student-centered instruction. We love finding opportunities to work individually with students and engaging them in our research and creative efforts. Our students have been cited in the College Mathematics Journal for their solutions of challenging problems. Other students have worked on research projects with our faculty and presented their work at regional conferences. A Every year a section of our students participate in the Putnam competition. Our students enjoy socializing in Math Society-a club for students interested in mathematics and computer science.

Recent graduates of our programs have started careers as actuaries, defense industry experts, high school teachers, and programmer/analysts. Others have gone on to graduate school in mathematics. Graduates of each program will cultivate the capabilities for presenting logical arguments, thinking abstractly, and formulating and solving problems. These attributes prepare the student for a lifetime of continuous advancement.

The Department of Mathematics offers the following degrees:

- Mathematics (BS) (p. 374)
- Mathematics (BS) - Applied Mathematics Concentration (p. 378)
- Mathematics (BS) - Secondary Education Concentration (p. 381)

## Mathematics (BS)

### Program Overview

The Bachelor of Science in Mathematics features a traditional, rigorous plan of study designed to expose the student to a broad range of mathematics at a level sufficient for graduate studies in math or statistics.

### Career Opportunities

Teacher (with the completion of additional preparation for certification), trade assistant, quantitative analyst, graduate studies

<sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.

- Area B1, 3 hours;
- Area B2, 1 hour;
- Area D1, 8 hours;
- Area D2, 3 hours.

<sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

<sup>1</sup> Guided elective will be selected from among freshman and sophomore level courses in science, business, and education based upon student interests and career goals and requiring the approval of a faculty advisor and the Mathematics Department Chair.

<sup>2</sup> STAT 5176U Statistical Design and Analysis of Experiments and STAT 5177U Applied Regression Analysis are recommended for graduate study in statistics. MATH 5135U College Geometry and MATH 5185U History of Mathematics are required for teacher certification.

<sup>3</sup> Only two attempts allowed for each of the following courses.

<sup>4</sup> If ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is not taken in Area C.

| AREA I                    | General Elective <sup>3</sup>                        | 3 |
| HIST 2111<br>or HIST 2112 | U. S. History to 1865<br>or U. S. History since 1865 | 3 |

**Credit Hours** 15

**Total Credit Hours** 123

<sup>1</sup> If MATH 1132 is used in Area D, the one extra hour will count in Area F.

<sup>2</sup> ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics recommended for the UTeach program.

<sup>3</sup> If an elective course is taken to complete the UTeach program or minor, then a C or better is required.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

**The student needs to work with his/her advisor to choose appropriate elective courses to make sure that he/she meets the total hours required for the program (123 or 125-128 with UTeach).**

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- an understanding of calculus and an ability to use calculus in applications
- knowledge of algebraic structures
- knowledge of the real numbers, functions, the topological properties of  $\mathbb{R}$ , differentiation, and integration
- knowledge of and the ability to apply probability density functions
- knowledge of appropriate mathematical models
- the ability to think critically
- the ability to understand mathematical arguments and to construct mathematical proofs
- the ability to use computational devices and software in problem solving situations
- communication skills to acquire, develop, and convey mathematical knowledge

## Mathematics (BS) - Applied Mathematics Concentration

### Program Overview

The Applied Math Concentration prepares the student for a career in industry. The student in Applied Math may select from two preparation tracks - actuarial science and statistics.

### Career Opportunities

Actuary, banking analyst, financial analyst, quantitative analyst, teacher (with the completion of additional preparation for certification), trade assistant

### Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

### Core Requirements

| Code                                             | Title                                       | Credit Hours |
|--------------------------------------------------|---------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                   |                                             |              |

- <sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.
- Area B1, 3 hours;
  - Area B2, 1 hour;
  - Area D1, 8 hours;
  - Area D2, 3 hours.

- <sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

| Code                                                                 | Title                              | Credit Hours |
|----------------------------------------------------------------------|------------------------------------|--------------|
| <b>Core Requirements</b>                                             |                                    |              |
| Complete the core requirements for this program                      |                                    | 45           |
| Core Total                                                           |                                    | 45           |
| <b>Area F Courses Related to Major</b>                               |                                    |              |
| Select the following course (the extra credit is counted in Area G): |                                    | 3            |
| CPSC 1301K                                                           | Computer Science I                 |              |
| 1 Math credit from the following (Area A or D):                      |                                    | 1            |
| MATH 1131                                                            | Calculus with Analytic Geometry I  |              |
| 4 Math credits for the following or 1 credit from Area D:            |                                    | 1-4          |
| MATH 1132                                                            | Calculus with Analytic Geometry II |              |

| <b>Total Credit Hours</b>                       |                                        | <b>123</b> |

- <sup>1</sup> Guided elective will be selected from among freshman and sophomore level courses in science, business, and education based upon student interests and career goals and requiring the approval of a faculty advisor and the Mathematics Department Chair.
- <sup>2</sup> STAT 5176U Statistical Design and Analysis of Experiments and STAT 5177U Applied Regression Analysis are recommended for graduate study in statistics. MATH 5135U College Geometry and MATH 5185U History of Mathematics are required for teacher certification.
- <sup>3</sup> Only two attempts allowed for each of the following courses.
- <sup>4</sup> If ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is not taken in Area C.
- <sup>5</sup> Hours in Area G and Area H must total 60 semester hours, with a total of 39 semester hours at the 3000 level or higher

## Area G Tracks

### Actuarial Science Track

<sup>1</sup> If not taken in Area E, course must be added in another semester.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

**The student needs to work with his/her advisor to choose appropriate elective courses to make sure that he/she meets the total hours 123 required for the program.**

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- an understanding of calculus and an ability to use calculus in applications
- knowledge of algebraic structures
- knowledge of the real numbers, functions, the topological properties of  $\mathbb{R}$ , differentiation, and integration
- knowledge of and the ability to apply probability density functions
- knowledge of appropriate mathematical models
- the ability to think critically
- the ability to understand mathematical arguments and to construct mathematical proofs
- the ability to use computational devices and software in problem solving situations
- communication skills to acquire, develop, and convey mathematical knowledge

# Mathematics (BS) - Secondary Education Concentration

## Program Overview

The BS in Mathematics - Secondary Education Track provides a sound foundation in mathematics, as well as course work necessary for teaching certification at the secondary level. As a part of UTeach Columbus (<https://uteach.columbusstate.edu/>), this program stresses early field experiences, inquiry based lessons, and highly engaged instruction. Education coursework focuses directly on math and science classroom settings.

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

## Career Opportunities

Teaching at the secondary level, trade assistant, quantitative analyst

## Program of Study

Click on the Program Map tab to view a term-by-term guide for completing the program requirements.

## Core Requirements

| Code                                             | Title                                                                | Credit Hours |
|--------------------------------------------------|----------------------------------------------------------------------|--------------|
| <b>Area A Essential Skills</b>                   |                                                                      |              |
| ENGL 1101                                        | English Composition I (minimum grade of C)                           | 3            |

| <b>Total Credit Hours</b>       |                                                                   | <b>45</b> |

- <sup>1</sup> Note: Students whose majors require 2 lab science courses in Area D complete Area B and Area D with a combined total of 15 credit hours. Any additional hours may be applied to Area F or beyond, depending on the program of study. Students should consult their advisors.
- Area B1, 3 hours;
  - Area B2, 1 hour;
  - Area D1, 8 hours;
  - Area D2, 3 hours.

- <sup>2</sup> ITDS 1145 Comparative Arts, though listed under both humanities and fine arts, may be taken only once.

## Major Requirements

<sup>1</sup> Guided elective will be selected from among freshman and sophomore level courses in science, business, and education based upon student interests and career goals and requiring the approval of a faculty advisor and the Mathematics Department Chair.

<sup>2</sup> Only two attempts allowed for each of the following courses.

<sup>3</sup> If ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is not taken in Area C.

## Program Map

| Course                                              | Title                                                       | Credit Hours |

| SPED 4115 | Teaching Math and Science to Exceptional Learners (minimum grade of C; see note below) | 2 |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

|                           |  |                |
|---------------------------|--|----------------|
| <b>Credit Hours</b>       |  | <b>12</b>      |
| <b>Total Credit Hours</b> |  | <b>123-124</b> |

<sup>1</sup> If MATH 1132 Calculus with Analytic Geometry II is used in Area D, the one extra hour will count in Area F.

<sup>2</sup> If ITDS 2125 Historical Perspectives on the Philosophy of Science and Mathematics is applied to Area G, then choose another course for Area C and take that in another semester.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.

- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.

## Admission Requirements

During the sophomore year, students intending to complete a teacher education program make formal application to the teacher education program. Normally, this occurs after the student has completed three semesters of full-time course work. For a list of current admission requirements, go to <https://cctl.columbusstate.edu/teacher-education> (<https://cctl.columbusstate.edu/teacher-education.php>)

## Additional Program Requirements

Students must complete all courses related to major with a C or better unless otherwise approved.

For teacher certification, students must obtain a minimum overall and CSU grade point average of 2.5.

Students must meet all requirements for admission to Teacher Education. For a list of current requirements, go to <https://cctl.columbusstate.edu/teacher-education.php>

Students must meet all requirements for admission to Student Teaching. For a list of current requirements, go to <https://cctl.columbusstate.edu/student-teaching.php>.

To be recommended for teacher certification, students must pass the GACE Mathematics Test I and Test II (for additional information on the GACE, go to <https://gace.ets.org/>).

## Program Learning Outcomes

- an understanding of calculus and an ability to use calculus in applications
- knowledge of algebraic structures
- knowledge of the real numbers, functions, the topological properties of  $\mathbb{R}$ , differentiation, and integration
- knowledge of and the ability to apply probability density functions
- Knowledge of appropriate mathematical models
- The ability to think critically
- The ability to understand mathematical arguments and to construct mathematical proofs
- The ability to use computational devices and software in problem solving situations
- communication skills to acquire, develop, and convey mathematical knowledge
- Demonstrate proficiency in planning instruction based on standards and knowledge of students
- Demonstrate proficiency in using a wide range of instructional strategies and differentiating instruction to help all students learn
- Demonstrate proficiencies related to assessing learning and teaching and using assessment data to adapt instruction for improved student learning

- Display values, commitments, dispositions, and habits associated with effective and professional teaching

## Department of Modern and Classical Languages

The Department of Modern and Classical Languages at Columbus State University is strongly committed to excellence in language and literature study. Our curriculum is designed to prepare undergraduates for critical thinking and employment flexibility. The department's philosophy emphasizes dynamic faculty-student academic encounters both in- and out- of the classroom; along with individualized attention for our majors and minors. Our faculty's expertise encompasses a broad range of topics spanning literature of Latin American and Spain, Hispanic women's writing, Spanish and Latin American culture, Hispanic linguistics, Second Language Acquisition, and the use of technology in the Humanities. Students can also take classes at the Elementary and Intermediate levels in Arabic, French, German, Japanese, and Latin.

The Department of Modern and Classical Languages offers the following degrees:

- Modern Language and Culture (BA) - Spanish Literature and Culture Track (p. 385)
- Modern Language and Culture (BA) - Spanish with Teacher Certification Track (p. 388)

## Modern Language and Culture (BA) - Spanish Literature and Culture Track

### Program Overview

Our curriculum is designed to prepare undergraduates for critical thinking and employment flexibility. The department's philosophy emphasizes dynamic faculty-student academic encounters both in- and out- of the classroom; along with individualized attention for our majors and minors. We are proud of our program's practical outcomes over the past six years:

**All** our graduates in the Teacher Certification track secured employment teaching HS Spanish in Georgia and elsewhere

**All** our graduates who applied to graduate school were admitted into regionally or nationally-recognized programs

Our faculty's expertise encompasses a broad range spanning Latin American literature, Hispanic women's writing, Spanish and Latin American culture, Hispanic linguistics, and the use of technology in the Humanities. Our students can take classes at the Elementary and Intermediate levels in Arabic, French, German, Japanese, and Latin.

## Career Opportunities

Students majoring in foreign languages are preparing themselves to be global citizens. This course of study can prepare students for a wide range of pursuits, including careers in education, government, business, or any institution with international dealings.

## Program of Study

<sup>1</sup> B2: Select 1 or 2 hours of the following courses:  
ITDS 1779 Scholarship Across the Disciplines (2 cr)  
LEAD 1705 Introduction to Servant Leadership (2 cr)  
PERS 1506 Perspectives (1 cr; may be repeated with a different topic)  
PERS 1507 Perspectives (2 cr)

<sup>2</sup> Wellness requirement: 3 credits divided into mandatory PHED 1205 Concepts of Fitness (2 credits) and one PEDS course from list (1 credit). Must be completed for graduation. Students that fall under certain categories may be exempted.

<sup>3</sup> Except ITDS 1145 Comparative Arts.

<sup>4</sup> Except ANTH 1105 Cultural Anthropology.

## Additional Notes

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses

can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester.

- This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
- Students must complete "Area A" (ENGL 1101 English Composition I, ENGL 1102 English Composition II, and MATH 1113 Pre-Calculus or MATH 1131 Calculus with Analytic Geometry I) prior to reaching 30 hours and earn a "C" or higher in all three courses.
- As of Fall 2013, all undergraduate students are required each semester to meet the 2.0 institutional GPA standard for satisfactory academic progress.
- Students are strongly encouraged to participate in study abroad programs offered in the summertime, either to Mexico or Spain.

## Admission Requirements

There are no program specific admission requirements.

## Additional Program Requirements

There are no program specific academic regulations.

## Program Learning Outcomes

- Students will demonstrate in the target language an Advanced-Low Proficiency level in speaking as defined by ACTFL
- Students will demonstrate in the target language an Advanced-Low Proficiency level in writing as defined by ACTFL
- Students will demonstrate in the target language an Advanced-Mid Proficiency level in reading or listening comprehension (the receptive skills) as defined by ACTFL
- Students will demonstrate the ability to think critically by analyzing and interpreting cultural information, customs (i.e. literary, historical, political, etc), and artifacts of the regions where the target language is used

## Modern Language and Culture (BA) - Spanish with Teacher Certification Track

### Program Overview

Our curriculum is designed to prepare undergraduates for critical thinking and employment flexibility. The department's philosophy emphasizes dynamic faculty-student academic encounters both in- and out- of the classroom; along with individualized attention for our majors and minors.

Our faculty's expertise encompasses a broad range spanning Latin American literature, Hispanic women's writing, Spanish and Latin American culture, Hispanic linguistics, and the use of technology in the Humanities. Our students can take classes at the Elementary and Intermediate levels in Arabic, French, German, Japanese, and Latin.

All educator preparation programs are approved by the Georgia Professional Standards Commission. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CQTL) website for detailed information about certification requirements and the certification process.

## Career Opportunities

We are proud of our program's practical outcomes over the past six years:

- **All** our graduates in the Teacher Certification track secured employment teaching HS Spanish in Georgia and elsewhere
- **All** our graduates who applied to graduate school were admitted into regionally or nationally-recognized programs

|-----------|---------------------------------------------------------------------------------------------------|---|
| SPED 2256 | Introduction to the Exceptional Learner in General Education (minimum grade of C; see note below) | 3 |
|-----------|---------------------------------------------------------------------------------------------------|---|

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

| There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course. |                                                                                                   |           |

There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course.

| There is a recent rule change for certification from the GaPSC. As of July 1, 2019, students must make a B or higher in the Exceptional Children's course. The course could be any of the following depending on your major: SPED 2256, EDCI 6228, KINS 4245, SPED 4115, PHED 6219. This rule change will not affect your graduation but you cannot become a certified educator with the state of Georgia until you receive the grade of B or higher in this course. |                                                                                                   |              |
